Liljedahl,2017-05-03 The book presents a selection of the most relevant talks given at the 21st MAVI conference held at the Politecnico di Milano The first section is dedicated to classroom practices and beliefs regarding those practices taking a look at prospective or practicing teachers views of different practices such as decision making the roles of explanations problem solving patterning and the use of play Of major interest to MAVI participants is the relationship between teachers professed beliefs and classroom practice aspects that provide the focus of the second section Three papers deal with teacher change which is notoriously difficult even when the teachers themselves are interested in changing their practice In turn the book s third section centers on the undercurrents of teaching and learning mathematics which can surface in various situations causing tensions and inconsistencies The last section of this book takes a look at emerging themes in affect related research with a particular focus on attitudes towards assessment The book offers a valuable resource for all teachers and researchers working in this area

Designing Quality Authentic Assessments

Tay Hui Yong,2018-04-19 This book examines the principles and practice of authentic assessment It seeks to answer the following questions What is authentic assessment How is authentic assessment different from performance assessment or alternative assessment How can authentic assessment support learner centred education especially when a performance oriented culture favours pen and paper examinations The book is structured into two major parts The first Principles of authentic assessment design provides readers with a conceptual explanation of authenticity the principles for designing quality authentic assessments for valid evidence of student learning and guidance about how to develop quality rubrics to structure assessment tasks The second part of the book Theory into practice provides examples developed by teachers to demonstrate an understanding of authentic assessment The subject areas covered include humanities languages mathematics sciences character and citizenship Two case studies are discussed to demonstrate how authentic assessment can be used to comprehensively address key learning objectives in a variety of curriculum contexts This book provides practitioners with concrete examples on how to develop authentic assessment to suit their context and also enhance their students learning The book will also enable teachers to face assessment challenges present in our changing world Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

Mathematical Modeling and Simulation of Systems

Serhiy Shkarlet,Anatoliy Morozov,Alexander Palagin,Dmitri Vinnikov,Nikolai Stoianov,Mark Zhelezniak,Volodymyr Kazymyr,2022-02-23 This book contains works on mathematical and simulation modeling of processes in various domains ecology and geographic information systems IT industry and project management The development of complex multicomponent systems requires an increase in accuracy

efficiency and adequacy while reducing the cost of their creation The studies presented in the book are useful to specialists who involved in the development of real events models analog management and decision making models production models and software products Scientists can get acquainted with the latest research in various decisions proposed by leading scholars and identify promising directions for solving complex scientific and practical problems The chapters of this book contain the contributions presented on the 16th International Scientific practical Conference MODS June 28 July 01 2021 Chernihiv Ukraine Mathematical Methods for Engineering Applications Fatih Yilmaz, Araceli Queiruga-Dios, Jesús Martín Vaquero, Ion Mierluș-Mazilu, Deolinda Rasteiro, Víctor Gayoso Martínez, 2023-03-08 This proceedings volume convenes selected peer reviewed papers presented at the 3rd International Conference on Mathematics and its Applications in Science and Engineering ICMASE 2022 which was held on July 4 7 2022 by the Technical University of Civil Engineering of Bucharest Romania Works in this volume cover new developments in applications of mathematics in science and engineering with emphasis on mathematical and computational modeling of real world problems Topics range from the use of differential equations to model mechanical structures to the employ of number theory in the development of information security and cryptography Educational issues specific to the acquisition of mathematical competencies by engineering and science students at all university levels are also touched on Researchers and university students are the natural audiences for this book which can be equally appealing to practitioners seeking up to date techniques in mathematical applications to different contexts and disciplines **Handbook of International Research in Mathematics Education** Lyn D. English, David Kirshner, 2015-07-30 This third edition of the Handbook of International Research in Mathematics Education provides a comprehensive overview of the most recent theoretical and practical developments in the field of mathematics education Authored by an array of internationally recognized scholars and edited by Lyn English and David Kirshner this collection brings together overviews and advances in mathematics education research spanning established and emerging topics diverse workplace and school environments and globally representative research priorities New perspectives are presented on a range of critical topics including embodied learning the theory practice divide new developments in the early years educating future mathematics education professors problem solving in a 21st century curriculum culture and mathematics learning complex systems critical analysis of design based research multimodal technologies and e textbooks Comprised of 12 revised and 17 new chapters this edition extends the Handbook s original themes for international research in mathematics education and remains in the process a definitive resource for the field *Smart Computing Techniques and Applications* Suresh Chandra Satapathy, Vikrant Bhateja, Margarita N. Favorskaya, T. Adilakshmi, 2021-07-13 This book presents best selected papers presented at the 4th International Conference on Smart Computing and Informatics SCI 2020 held at the Department of Computer Science and Engineering Vasavi College of Engineering Autonomous Hyderabad Telangana India It presents advanced and multi disciplinary research towards the design of smart computing and informatics

The theme is on a broader front which focuses on various innovation paradigms in system knowledge intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society environment and industries The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches optimizing solutions in various disciplines of science technology and health care *Вестник МГСУ №10 2014*, 2017-04-29 2005 05 23 00 05 02 00 05 13 00 05 26 00 08 00 00 c *Intelligent Systems Technologies and Applications 2016* Juan Manuel Corchado Rodriguez, Sushmita Mitra, Sabu M.
