

# HOME SWIMMING POOL SAFETY CHECKLIST

This checklist does not substitute for a pool inspection and is for educational purposes only. Pool owners should consider getting a professional assessment of their pool's compliance.

**Adult supervision, in combination with compliant pool safety fencing, is the most effective method of preventing a child from drowning.**

**Please check, fix and maintain your pool and safety barrier on a regular basis.**

**Pool barrier requirements apply to spa pools indoor, outdoor, in ground, aboveground and other portable pools capable of being filled with water to a depth of 300mm or more.**

## SWIMMING POOL FENCE

❖ **Must be secure and in good working order**

❖ **Must be at least 1.2m high**

|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Is there a pool fence or other child-resistant barrier separating the pool from your house and adjoining properties and public spaces at all times?                           | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Install compliant pool fencing.                                                                                                                                                                            |
| Is the outside of the pool fence at least 1200mm high all the way around when measured from ground level?                                                                     | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Remove vegetation from around the fence line or raise the pool fence until there is a continual height of at least 1200mm achieved.                                                                        |
| If a boundary fence forms part of the pool barrier, and your pool was built after 2006, is the boundary fence at least 1800mm high?                                           | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Install 1.8m high fencing to those sections of the boundary fence that form part of the pool safety barrier.                                                                                               |
| Is the gap between the bottom of the fence and the ground less than 100mm?                                                                                                    | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Reduce the gap by either attaching additional material to the bottom of the fence or concreting rocks, bricks etc. into the ground beneath the fence.                                                      |
| Are all vertical rails on the fence less than 100mm apart?                                                                                                                    | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Either reposition the vertical rails or install additional rails so that gaps between the rails are no greater than 100mm.                                                                                 |
| If you have a timber pool fence and the vertical rails are more than 10mm apart, is there a distance of at least 900mm between the top and bottom horizontal rails?           | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Install an additional horizontal rail along the top horizontal rail so that there is 900mm between the upper surfaces of the bottom and top horizontal rails.                                              |
| Is the distance between any potential handholds and footholds on the pool fence and its associated space at least 900mm apart to inhibit a young child from climbing over it? | <input type="checkbox"/> Yes | <input type="checkbox"/> No – Either remove the potential handholds and footholds or shield them using any durable non-climbable material, such as acrylic or polycarbonate sheeting or aviary wire that has holes no greater than 13mm. |
