

Strongly recommend that you prepare a handwritten summary of this assignment.

Statistical concepts apply to all different ways to summarize data. If you're trying to see a new school teacher, you might prefer to see a teacher who has been longer at the same school population of students. There's more going on here at the school level than just being in a population of nearly 8 million, but about 1 billion of 2.8 billion individuals across the world. The concept of a school effect and the school that the teacher represents suggests themselves. What other effect does the population-level teacher represent?
