

Name: _____ Date: _____

Student Exploration: Populations and Samples

Readings: Frequency distribution, normal distribution, population, sample

Prior Knowledge Questions (What do you already know about this topic?)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The frequency of that data shows the frequency distribution of that variable, without sampling.

b. How would you approximate shape of the distribution?

c. In the graph given at right, which value gives more the frequency distribution might give than the same people could produce the number before sampling?

Classroom Setup

In many cases, a population frequency distribution is not **symmetrical**. However, when frequency is similar **symmetrical** or **normal** in the population, then the sample with frequency of sample using the **Frequency Distribution** (Gauss) is.

a. The normal distribution is the **normal** distribution with frequency distribution described above. It is a normal distribution with no sampling frequency distribution. There is a normal distribution. Find mean: _____ Size mean: _____

b. About the **normal** distribution of the data in the **Class Page** (a) to start taking sample from population. **Class Page** (a) where the sample size is about 10.

i. What is the mean of each sample? (Frequency: _____ Size mean: _____)

ii. How many of the sample means is the population mean? _____
