

Lab 11: Animal Behavior

ESSAY 1997

A scientist working with *Bursatella leachii*, a sea slug that lives in an intertidal habitat in the coastal waters of Puerto Rico, gathered the following information about the distribution of the sea slugs within a ten-meter square plot over a 10-day period.

time of day	12 mid	4am	8am	12 noon	4pm	8pm	12 mid
average distance between individuals	8.0	8.9	44.8	174.0	350.5	60.5	8.0

- For the data above, provide information on each of the following:
 - Summarize the pattern.
 - Identify three physiological or environmental variables that could cause the slugs to vary their distance from each other.
 - Explain how each variable could bring about the observed pattern of distribution.
- Choose one of the variables that you identified and design a controlled experiment to test your hypothetical explanation. Describe results that would support or refute your hypothesis.
