has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors—schools, teachers, parents, students, international organizations, private sector providers, civil society, and the media—have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not. Back cover

The Next Generation of Testing Hong

Jiao, Robert W. Lissitz, 2015-11-01. The Race To The Top RTTP federal education policy fostered a new generation of state tests. This policy advocated adopting common core standards which set a higher level of learning targets for students in the US K-12 education. These standards are intended to assess higher order thinking skills and prepare students ready for college and career. In the meantime, they are aligned with those for international assessments which keep US students abreast of their international peers. Furthermore, the new generation of state tests requires the use of technology-enhanced items to align student assessments with student learning environment. Computer technology is indispensable to accomplish this goal. Computer-based tests related to common core standards are different from previous state computer-based tests in two important aspects: one is that the current version requires accurate assessment of students along all ability levels, and the other is that it promotes the use of an efficient test delivery system, essentially the use of computerized adaptive assessment in K-12 state testing programs. In addition to providing summative information about student learning, the new common core tests add a formative assessment component in the whole assessment system to provide timely feedback to students and teachers during the process of student learning and teacher instruction. As with its predecessor, the new assessment policy also holds teachers and schools accountable for student learning. With the requirements by the new federal education policy, states formed two consortia: Partnership for Assessment of Readiness for College and Careers (PARCC) and Smarter Balanced Assessment Consortium (SBAC) to develop assessments in alignment with the new common core standards. This book is based on the presentations made at the Thirteenth Annual Maryland Assessment Research Center's Conference on The Next Generation of Testing. Common Core Standards, Smarter Balanced, PARCC, and the Nationwide Testing Movement Experts from the consortia and nationwide overviewed the intention, history, and the current status of this nationwide testing movement. Item development, test design, and transition from old state tests to the new consortia tests are discussed. Test scoring and reporting are specially highlighted in the book. The challenges related to standard setting for the new test, especially in the CAT environment and linking performance standards from state tests with consortium tests, were explored. The issues of utilizing the consortium test results to evaluate students' college and career readiness is another topic addressed in the book. The last chapters address the critical issue of validity in the new generation of state testing programs.

Overall this book presents the latest status of the development of the two consortium assessment systems. It addresses the most challenging issues related to the next generation of state testing programs including development of innovative items, assessing higher order thinking skills, scoring of such items, standard setting and linkage with the old state specific standards and validity issues. This edited book provides a very good source of information related to the consortium tests based on the common core standards.

Teaching English Through ELA, Mathematics, Science, and Social Studies Long Peng, 2022-07-21. Accessible and hands-on, this textbook provides a comprehensive introduction to teaching language through content, an approach known as Content Based Language Teaching (CBLT). A content-based language focused approach to teaching in the disciplines is essential to serving the language and disciplinary needs of English learners (ELs) in the classroom. Guided by learning standards and informed by research, this book demonstrates how content materials in the English Language Arts, ELA, Mathematics, Science, and Social Studies can be harnessed to develop the English language proficiency of ELs as well as advance their disciplinary knowledge and skills. Using content materials in ELA, Mathematics, Science, and Social Studies as a starting point, this textbook illustrates how to teach English as an additional language effectively by integrating language instruction with disciplinary teaching. It showcases numerous learning and instructional activities complete with targeted language exemplified in sentential and discourse contexts, direct instruction, teacher modeling, guided and individual practices and assessments which are further backed up by detailed discussions of their goals, rationales and implementation. This textbook also features a discussion of differentiation to address the varied needs of students. To further assist readers in determining how to incorporate language instruction, Peng identifies extensive possibilities for language teaching that are based on the same content materials and beyond those targeted by sample learning activities. Each chapter ends with three types of exercises: multiple choice questions, open-ended discussion questions, and problems of application to bolster understanding, promote reflection and encourage application. Complementing the book are additional online resources including ready-to-use PowerPoints which are available on the book's webpage at [Routledge.com/9780367521134](https://www.routledge.com/9780367521134). Covering key issues such as characteristics of effective language instruction, differentiation and the challenges associated with CBLT, this is an essential text in TESOL methods and content area language teaching as well as an invaluable resource for pre-service and in-service ESL/EFL teachers and content area teachers who are interested in
