Ponds and small lakes Brian Moss, 2017-03-08 Ponds and small lakes support an extremely rich biodiversity of fascinating organisms Many people have tried pond dipping and encountered a few unfamiliar creatures such as dragonfly nymphs and caddisfly larvae However there is a far richer world of microscopic organisms such as diatoms desmids and rotifers which is revealed in this book Anyone with access to a microscope can open up this hidden dimension Identification keys are provided so that readers can identify explore and study this microscopic world There are also many suggestions of ways in which readers can then make original contributions to our knowledge and understanding of pond ecology The book not only explores the fascinating world of the creatures within ponds and their interactions but also explains the many ways in which ponds are important in human affairs Ponds are being lost around the world but they are a key part of a system that maintains our climate In the face of climate change it has never been more important to understand the ecology of ponds Includes keys to A Traditional key to kingdoms of organisms B Contemporary key to kingdoms of organisms C Pragmatic key to groups of microorganisms D Algae visible at least en masse to the naked eye E Periphyton both attached to surfaces and free living F Protozoa G Freshwater invertebrates and H Common phytoplankton genera in ponds

Journal of Biological Education, 1993

The Classroom Teacher Milo Burdette Hillegas, Thomas Henry Briggs, 1929

Education Outside the Classroom Great Britain. Parliament. House of Commons. Education and Skills Committee, 2005 The Committees report examines the wide range of outdoor learning experiences from lessons held within school grounds to residential expeditions abroad and considers the place of outdoor learning in the curriculum from foundation stage to higher education Issues discussed include the value of outdoor learning and the decline of opportunities for educational opportunities outside the classroom the barriers that deter schools from teaching outside the classroom including perceptions of risks in school trips the resources and curriculum time available for such trips availability and costs involved policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning and funding implications The

Committees recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto around 30 million in order to deliver real change *Think Green, Take Action* Daniel A. Kriesberg, 2010-08-16 This book provides an annotated bibliography of age appropriate literature and activities showing children the importance of environmental issues and teaching them the skills to take action In past years teaching children about conservation and environmental issues might have been an optional side topic to complement an earth science curriculum but in today s educational climate being green is a subject with great relevance and importance This book combines a wide variety of techniques to help students understand environmental issues and gain the skills needed to take action The children s literature and classroom activities suggested in *Think Green Take Action Books and Activities for Kids* are appropriate for elementary school students from grades three through seven covering three major environmental issues endangered species resource depletion and pollution After students have a grasp of the causes of these environmental problems the final chapter presents ways to take easy action that can create ripples of change across the world Educators in museums and nature centers home schooled children and their parents comprise an appropriate secondary audience for this instructive text

Amphibian Survey and Monitoring Handbook John W. Wilkinson, 2015-08-17 Evidence bases for conservation are becoming increasingly important to convince landowners and politicians of the need to take action in defence of species and habitats all around the world A valuable feature of this book is its emphasis on collecting and analysing such essential information Trevor Beebee *Phyllomedusa* Amphibians are among the most globally endangered groups of vertebrates with more than one third of species being assessed as declining or threatened Often amphibian declines can be attributed to a suite of interacting factors many of which are human in origin but further information is needed to elaborate the key causes and to discover ways of reversing declines Robust surveys provide vital ecological and biological data on amphibian populations and underpin the decisions made to protect species and reverse their declines Ongoing monitoring informs land managers and decision makers about whether they are taking the right action This book is designed to help you carry out amphibian surveying and monitoring so that the results of your surveys can be used effectively Part 1 introduces amphibians order Anura frogs and toads Caudata newts and salamanders and order Gymnophonia caecilians Part 2 is essential reading before you start surveying It introduces the different types of survey and monitoring programmes and discusses survey aims and resources It contains chapters on collecting and handling survey data survey permissions and licencing health and safety and biosecurity and handling amphibians Part 3 discusses everything you need to know during your survey and provides a detailed look at amphibian survey methods Part 4 covers presenting and using your survey s data to best effect A useful resources section is also provided with example survey forms and details of additional information resources that will optimize the impacts of your surveys Key amphibian survey techniques are discussed with reference to published examples of successful surveys so you ll

be able to choose what's right for your situation. Tips on optimizing your survey effort and handling amphibians in the field are also included. Whether carrying out a student expedition project or seeking information to support the management of a protected area, this book contains essential advice from an amphibian ecologist who has encountered the same sorts of decisions you'll face when planning your surveys.
