Handbook of Golf Science Martin Toms, 2017-10-23 Golf is one of the world's major sports and consequently the focus of world-class scientific research. This landmark publication is the most comprehensive book ever published on the science of golf, covering every sub-discipline from physiology, biomechanics, and psychology to strength and conditioning, youth development, and equipment design. Showcasing original research from leading golf scientists across the globe, it examines the fundamental science underpinning the game and demonstrates how it can be applied in practice to improve and develop players. Each chapter provides a definitive account of the current state of knowledge in a particular area of golf science, addressing the limitations of existing research, presenting new areas for development, and discussing the implications for coaches, players, scientists, and the wider golfing public. Truly international in scope, the variety of topics explored includes biomechanics and equipment, skill learning and technology, performance development, psychological techniques for success, the golfing body. This is an essential reference for any student or researcher with an interest in the game or any coach or professional looking to improve their knowledge.

Healthcare Management Volker Eric Amelung, 2019-10-10 This textbook on Healthcare Management provides a systematic and comprehensive overview of the organisational forms and management instruments implemented in managed care. Within the international discussion on the structure of healthcare systems, managed care is an increasingly important topic. Over more than twenty years, managed care approaches have fundamentally influenced healthcare systems in terms of patient orientation, efficiency, and quality. Experts assume that up to 20% of healthcare expenses can be saved by applying high-quality managed care approaches. By using suitable organisational forms and management principles, not only can costs be reduced, but the quality of medical service provision can be augmented. Managed care is therefore much more than a cost-cutting strategy. Advocates consider managed care to be a logical and necessary developmental step in modern healthcare systems. An increase in quality and at the same time a reduction of costs is not seen as contradictory but rather as consistent. Therefore, managed care is a response to changed challenges in the provision of healthcare.
