relational thinking to political analysis Instead of merely providing an overview of possible trajectories for articulating a relational political analysis Peeter Selg and Andreas Ventsel put forth a concrete relational theory of the political which has implications for research methodology culminating in a concrete method they call political form analysis In addition they sketch out several applications of this theory methodology and method They call their approach political semiotics and argue that it is a fruitful way of conducting research on power governance and democracy the core dimensions of the political in a manner that is envisioned in numerous discussions of the relational turn in the social sciences It is the first monograph that attempts to outline an approach to the political that would be relational throughout from its meta theoretical and theoretical premises through to its methodological implications methods and empirical applications **Gender and Political Analysis**

Jakobi, Kerstin Martens, Klaus Dieter Wolf, 2009-09-10 This pioneering volume is devoted to the analysis of education from the perspective of political science applying the full range of the discipline s analytical perspectives and methodological tools The contributions demonstrate how education policy can be explored systematically from a variety of political science perspectives comparative politics public policy analysis and public administration international relations and political theory By applying a governance perspective on education policy the authors explore the changing institutional settings new actors constellations horizontal modes of interaction and public private regulatory mechanisms with respect to the role of the state in this policy field The volume deals with questions that are not merely concerned with the content or outcomes of education but it explicitly takes a political science view on how education politics work Including country case studies from the Americas and across Europe institutional analyses of education policy in the EU and the WTO GATS as well as normative reflections on the topic the volume provides a grand overview on the diversity of issues in education policy Dealing with a so far neglected field of policy this book provides a comprehensive and accessible analysis of a rapidly changing topic Education in Political Science will be of interest to scholars and students of political science education sociology and economics **Re-thinking Contemporary Political Behaviour** Sadiya Akram, 2019-02-07 Proposing a novel approach to understanding the contemporary political landscape Akram draws on the work of Pierre Bourdieu and Margaret Archer on agency and argues the need for an in depth engagement with concepts of agency to improve the reach and scope of political analysis Is the way that people engage with

politics changing If so how well equipped are we to document and explain the extent and range of the ways in which people are engaging in politics today This book tackles these questions through a blend of theoretical reflection and empirical research shedding new light on the relationship between arena and process definitions of politics and how the social relates to the political Hitherto unexplored features of agency such as the unconscious and the internal political conversation are shown to be critical in exploring how people mobilise today and how they make sense of their political engagement Two in depth case studies of the internal political conversations that individuals hold as well as an analysis of the 2011 UK riots are presented Making a case for the role of self expression in politics this book will be of use for graduates and scholars interested in British politics political theory social theory political sociology the theory and practice of political engagement and political behaviour

*The Political Class* Peter Allen,2018-04-14 Recent years have seen an intensification of discussion on the issue of Britain s political class The question of who our politicians are is front and centre Do they represent us Are all politicians just in it for themselves Are they disconnected from the lives of normal people In *The Political Class* Peter Allen argues that our current political class are in many important ways unlike the British people as a whole and this matters a lot Our politicians are currently largely drawn from limited sections of society reflecting patterns of wider social and economic inequality which mean that for many people running for political office is almost impossible This leaves us with a political class that can justifiably be described as uniform in who they are what they think and how they behave Putting the state of British democracy under the microscope Allen argues that having a more diverse political class would not only better reflect democratic principles of equality but would also result in more legitimate political outcomes We need to radically reshape political institutions so that more citizens have a real chance of becoming involved in making the decisions that affect all of our lives Only by doing this can the gap between the political class and the public be reduced and British democracy live up to its name
