The Ultimate Diabetic Recipe Book Emilie Vans, 2022-01-28. Diabetes is an illness that affects millions of people worldwide. People with diabetes have low or no insulin production in their pancreas, which causes high glucose levels. When this happens, blood sugar can build up so high, which can lead to several health problems. If you think someone you know may have diabetes or if you are concerned about your own diabetes symptoms, take action today. Diabetes is an illness that is caused by a lack of insulin. Insulin is a hormone produced in the pancreas that allows your cells to take sugar from food and use it for energy.
