

LETTER OF RECOMMENDATION FOR INTERNAL MEDICINE RESIDENCY SAMPLE

Dear program director,

It's my honor to recommend Shaleen Shanice into your Internal medicine program. My name is Dr. Austin and I am the chief physician at St.Stephen Hospital, Ireland. It was my pleasure to work with Shaleen during her fourth year medical rotation in this hospital. She was very eager to learn, focused in her duties and I have been quite impressed by her outstanding performance in relating with patients. Also, she was excellent in correlating theoretical work to practical in the hospital. I see her as a knowledgeable student with high level of compassion.

Shaleen did very well in her USMLE test emerging the best among the many students. She is an intelligent student, due to her ability to come up with independent ways of doing things. During the normal rotations, she managed to talk to patients of all ages, and gave them a listening ear so as to form an accurate judgment regarding their treatment plan. While supervising her, it was clear in my mind that Shaleen would make the best doctor in the future. Due to this reason, I believe she will make one of the excellent residents in your hospital.

Shaleen portrayed a high level of concept mastery, which was demonstrated by her ability to contribute during the morning meetings. Her thinking was patient centered and aimed to provide the quality care. Apart from creating a good rapport with patients, she extended the same to other colleagues, which improved the teamwork spirit. Consequently, our services to patients were greatly improved.

I have a high hope you will sincerely consider her in your residency program as I have witnessed her brilliant talent and qualifications. I am sure she will be instrumental towards achieving your institution's objectives. In case of further questions or clarification feel free to contact me through my email.

Yours sincerely,
Dr. Austin Reeves.

Guidebook for Clerkship Directors Alliance for Clinical Education, 2014-08-26 a must read for the individual who has accepted the responsibility to direct a clinical clerkship for a medical school JAMA

International Medical Graduates in the United States Hassaan Tohid, Howard Maibach, 2021-01-04 Thousands of international medical graduates come to the United States to start their career as physicians Many of them however are not aware of the challenges and problems that they may encounter along the way These difficulties can range from the language and cultural barriers to a lack of confidence and self esteem Many students are also unaware of the other career options besides getting into a clinical residency program As a result of these issues a great number of foreign medical students remain unmatched into the National Resident Matching Program Not

matching can be devastating for these graduates both financially and medically. Students often suffer from psychological effects like major depression and generalized anxiety disorder. This book outlines the potential problems faced by these graduates and their possible solutions. Each chapter collects research evidence, interviews, and surveys to gather information to work on each possible problem one by one and describes a solution in great detail. Comprised of thirty chapters, each chapter is broken down into smaller sub-sections to investigate the main theme in depth. Issues addressed include the different types of international medical graduates and their lives in the United States, differences in the education system and healthcare system, the triangle of residency, language and cultural barriers, lack of professional contacts, confidence, self-image, and self-esteem issues, and restriction to specific fields and career paths. Written by experts in the field, *International Medical Graduates in the United States* is a first of its kind text that addresses the biggest issues faced by foreign medical graduates in today's world.

Handbook of Psychiatric Education, Second Edition Donna M. Sudak, M.D., 2021-03-08

Psychiatric education has increased in complexity and content since the previous edition of this book. Educators contend with a staggering amount of educational content, new teaching methodologies, and regulatory requirements. The excitement of engaging new learners is often offset by an overwhelming sense of information overload. This book is divided into three parts. Part I reviews general scholarship about adult learning, principles, mentorship, boundaries, and supervision, and models for a principle-driven approach to educational scholarship and professionalism and well-being. Part II covers issues germane to medical student education, including curricular and clerkship management, special considerations in contemporary undergraduate medical education, evaluation strategies, and the crossover topic of recruiting and advising medical students into psychiatry graduate medical education. Part III relates to graduate training in psychiatry. Administration, financing, and regulatory requirements, curriculum development, specific strategies for managing the problem trainee, and fellowship training are the major topic areas covered. The book concludes with a chapter on career development in psychiatric education. Each author has made a considerable effort to provide references to Web-based content so that readers may obtain the most current information about training and use the principles in each chapter with the most current regulations and guidelines.
