

MANAGEMENT LEADERSHIP

- Top management demonstrates its commitment to continuous improvement in safety and health, communicates that commitment to workers, and sets program expectations and responsibilities.
- Managers at all levels make safety and health a core organizational value, establish safety and health goals and objectives, provide adequate resources and support for the program, and set a good example.

WORKER PARTICIPATION

- Workers and their representatives are involved in all aspects of the program—including setting goals, identifying and reporting hazards, investigating incidents, and tracking progress.
- All workers, including contractors and temporary workers, understand their roles and responsibilities under the program and what they need to do to effectively carry them out.
- Workers are encouraged and have means to communicate openly with management and to report safety and health concerns without fear of retaliation.
- Any potential barriers or obstacles to worker participation in the program (for example, language, lack of information, or disincentives) are removed or addressed.

HAZARD IDENTIFICATION & ASSESSMENT

- Procedures are put in place to continually identify workplace hazards and evaluate risks.
- Safety and health hazards from routine, nonroutine, and emergency situations are identified and assessed.
- An initial assessment of existing hazards, exposures, and control measures is followed by periodic inspections and reassessments, to identify new hazards.
- Any incidents are investigated with the goal of identifying the root causes.
- Identified hazards are prioritized for control.

HAZARD PREVENTION & CONTROL

- Employers and workers cooperate to identify and select methods for eliminating, preventing, or controlling workplace hazards.
- Controls are selected according to a hierarchy that uses engineering solutions first, followed by safe work practices, administrative controls, and finally personal protective equipment (PPE).
- A plan is developed to ensure that controls are implemented, interim protection is provided, progress is tracked, and the effectiveness of controls is verified.

EDUCATION & TRAINING

- All workers are trained to understand how the program works and how to carry out the responsibilities assigned to them under the program.
- Employers, managers, and supervisors receive training on safety concepts and their responsibility for protecting workers' rights and responding to workers' reports and concerns.
- All workers are trained to recognize workplace hazards and to understand the control measures that have been implemented.

PROGRAM EVALUATION & IMPROVEMENT

- Control measures are periodically evaluated for effectiveness.
- Processes are established to monitor program performance, verify program implementation, and identify program shortcomings and opportunities for improvement.
- Necessary actions are taken to improve the program and overall safety and health performance.

COMMUNICATION AND COORDINATION FOR HOST EMPLOYERS, CONTRACTORS, AND STAFFING AGENCIES

- Host employers, contractors, and staffing agencies commit to providing the same level of safety and health protection to all employees.
- Host employers, contractors, and staffing agencies communicate the hazards present at the worksite and the hazards that work of contract workers may create on site.
- Host employers establish specifications and qualifications for contractors and staffing agencies.
- Before beginning work, host employers, contractors, and staffing agencies coordinate on work planning and scheduling to identify and resolve any conflicts that could affect safety or health.

Index **College of Commercial Arbitrators Guide to Best Practices in Commercial Arbitration - Third Edition**

James M. Gaitis, Carl F. Ingwalson, Jr., Vivien B. Shelanski, 2014-01-01 This third edition of The College of Commercial Arbitrators Guide to Best Practices in Commercial Arbitration has been substantially expanded not only to ensure that it is up to date but also to incorporate several new chapters on diverse subjects including intratribunal relations arbitrators fees eDiscovery and hybrid arbitration processes Summary of New Material Twice as long as the second edition Substantial revision and expansion of existing chapters Four new chapters Arbitrators Fees Expenses eDiscovery Intratribunal Relations Hybrid Arbitration Proceedings Updated to take into account evolving case law and to address newly emerging issues relating to the management of commercial arbitrations Comparative tables regarding certain aspects of in major international rules and international arbitration institution policies Revised to take into account The new 2013 CPR Administered Arbitration Rules The 2013 revisions to the AAA Commercial Rules Various protocols and guidelines relating to domestic commercial arbitration The 2011 revisions to the JAMS International Rules The 2012 revisions to the ICDR Articles The 2010 revisions to the UNCITRAL Rules The 2013 IBA Guidelines on Party Representation in International Arbitration The 2010 revisions to the IBA Rules on the Taking of Evidence in International Arbitration Various protocols and guidelines relating to domestic commercial arbitration The aim of the Guide is to identify best practices that arbitrators can employ to provide users of arbitration with the highest possible standards of economy and fairness in the disposition of business disputes This third edition of the Guide refines the guidance contained in the first and second editions to take into account developing case law revised institutional rules advancements in arbitration techniques and thinking and also addresses newly evolving issues such as electronic discovery There are significant differences in the ways in which arbitrations are conducted in different substantive fields of commerce and among different arbitrators in the same field Techniques that are appropriate and useful in one case may be quite unsuited to another For this reason it is not possible to prescribe a single set of best practices that commercial arbitrators should invariably follow in every case Rather this Guide attempts to identify the principal issues that typically arise in each successive stage of an arbitration and to explain the pros and cons of various preferred ways of handling each issue From this perspective the best practice for an arbitrator is to carefully consider the merits of alternative techniques available for dealing with a particular issue and to then select the technique best suited to the situation In addition the Guide attempts to identify the full array of practices available for use in complex arbitrations which can be adapted and streamlined for simpler cases Formed in 2001 the College of Commercial Arbitrators is a non profit organization composed of prominent experienced commercial arbitrators who believe that a national association of commercial arbitrators can provide a meaningful contribution to the profession to the public and to the businesses and lawyers who depend on arbitration as a primary means of dispute resolution Its mission includes promoting professionalism and high ethical practice in commercial arbitration adopting and maintaining standards of conduct providing peer training

and professional development and developing and publishing best practices materials This work is the College's principal vehicle for fulfilling several aspects of its mission Many seasoned and knowledgeable practitioners generously contributed their time and insights to the creation of this Guide

SAN Boot Implementation and Best Practices Guide for IBM System

Storage Sangam Racherla, Delmar Demarchi, Scott Dybas, Bobby Stark, Mansoor Syed, IBM Redbooks, 2012-09-30 Booting servers from a storage area network SAN is being used increasingly in complex data center environments today due to its significant benefits over the traditional method of booting from local disks SAN Boot enables organizations to maximize consolidation of their IT resources minimize their equipment costs and realize the considerable management benefits of centralizing the boot process In SAN Boot you can deploy diskless servers in an environment where the boot disk is located on often RAID capable storage connected to the SAN The server initiator communicates with the storage device target

through the SAN using the Fibre Channel host bus adapter HBA The system downtime is greatly minimized in case a critical component such as a processor memory or host bus adapter fails and needs to be replaced The system administrator needs to swap only the hardware and reconfigure the HBA s BIOS switch zoning and host port definitions on the storage server The system image still exists on the logical drive therefore the server is fully operational after the hardware swap and configuration change is completed This IBM Redbooks publication can help you with the SAN Boot implementation We present various SAN Boot scenarios using IBM System Storage products that include DS5000 DS8000 XIV and SVC The operating systems that are covered include Windows 2008 Red Hat Linux SUSE Linux and VMware
