Peixoto Basso,Thiago Olitta Basso,Luiz Carlos Basso,2021-08-18 Biotechnological Applications of Biomass provides a comprehensive overview of the current state of the art of biomass utilization in agriculture and pharmaceuticals The information contained herein is useful to researchers and other readers interested in biomass utilization and production of bioproducts **Integrated Management of Arthropod Pests and Insect Borne Diseases** Aurelio Ciancio,K.G.

Mukerji,2010-06-16 This is the last volume of the IPMD series It aims in a multi disciplinary approach at reviewing and discussing recent advances and achievements in the practice of crop protection and integrated pest and disease management This last effort deals with management of arthropods and is organized with a first section on biological control in citrus orchards a second one on advanced and integrated technologies for insect pest management and a last section dealing with mites and their biological control A wide and exhaustive literature already covers several aspects of chemical or biological control of insects and mites but there is still a need for a more holistic vision of management accounting for different problems and solutions as they are applied or developed in different regions and cropping systems worldwide In this series we attempted to fill this gap providing an informative coverage for a broad range of agricultural systems and situations

Insects as food and feed: From production to consumption Arnold Van Huis,Jeffrey Tomberlin,2017-09-15 Alternative protein sources are urgently required as the available land area is not sufficient to satisfy the growing demand for meat Insects have a high potential of becoming a new sector in the food and feed industry mainly because of the many environmental benefits when compared to meat production This will be outlined in the book as well as the whole process from rearing to marketing The rearing involves large scale and small scale production facility design the management of diseases and how to assure that the insects will be of high quality genetics The nutrient content of insects will be discussed and how this is influenced by life stage diet the environment and processing Technological processing requires decontamination preservation and ensuring microbial safety The prevention of health risks e g allergies will be discussed as well as labelling certification and legislative frameworks Additional issues are insect welfare the creation of an enabling environment how to deal with consumers gastronomy and marketing strategies Examples of production systems will be given both from the tropics palm weevils grasshoppers crickets and from temperate zones black soldier flies and house flies as feed and mealworms and crickets as food Detailed photographs are shown at the beginning of each section and chapter

Identification and Management of Horticultural Pests A. M. Ranjith,2013-01-15 This book has been written primarily due to my own felt need to have a comprehensive text book on the pests of horticultural crops and methods to manage it in the integrated way Due to the widespread use of digital color photography and the good resolution that you get in even the basic level digital cameras it is possible to get good photos It was thus more of a need to have a text book to teach the UG and PG students that this book was written It was also necessary that any practicing field level worker like officers of the state department of Agriculture and commodity boards and every practicing farmer with an ability to read English text

book should be guided into the basic facts about the pests of crops It is most likely that most of the information is available in this book itself as pest of some other crop It will then be possible to read on the pest in that and manage the pest effectively using the latest techniques available to the crop management expert
