Policy Making in the European Union - Policy Making and Implementation Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics. Topic: European Union, grade 1.0. Jagiellonian University in Krakow, Centre for European Studies, course: EU Law and Institutions, language: English, abstract: Now in January 2002 a visible step in European integration has been accomplished. With the introduction of the European currency, about 296.8 million citizens¹ of the European Union (EU) will hold the new symbols of unity of Europe's peoples in their hands. What began with an attempt of reconciliation and co-operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational intergovernmental organisation. However, throughout the EU, prevail doubts concerning the deeper mechanism of policy making. Despite certain inscrutability and the mysterious nature of decision making, there are demands for more democracy in the Union. On the other side, it may be assumed that most of the European citizens do not really take notice of high and low politics decided upon in the European institutions. Aim of this paper shall therefore be a closer elaboration of the policy making process in the European Union, the enforcement of decisions on European and national level and finally influences or interdependencies from outside the formal institution interfering in Europe's policy and polity. Hence, the results of the Nice IGC are not ratified yet, which might not be assumed soon. I focus on the binding regulations of the Amsterdam Treaty². After a short description of the, as I would prefer to name it, macro level (Commission, Council, Parliament, Courts) where provisions are concluded, the implementation of these policies and decisions on the micro national level shall be explained thereafter. Finally, outside impetus (lobbying, national interests, etc.) on the decision and interpretation process shall be elaborated in a limited scope as well.

The text's accessible writing style makes it the ideal starting point for anyone wishing to fully understand the workings of this complex and ever-evolving system. Along the way, helpful features including key points, questions and examples support your learning. Book jacket

Communications Booknotes Quarterly This well written book deals with the emergence and shaping of telecommunications policy in Europe with a particular focus on the time period of 1987 1998 This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way without falling into the trap of admiring critical personalities and key actors The author has written an important and useful book which invites the research community to further explore the evolution of European telecommunications policy Erik Bohlin

Communications Strategies Examining the emergence of a European Union telecommunications policy Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others He provides a history of the key actors in the policy making process from the first attempts by the national postal telegraph and telecommunication administrations to coordinate their telecommunications policies in the 1950s to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003 The analytical framework employed by the author draws upon new institutionalism and actor based approaches providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy making The focus of his analysis is on the European Commission s two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to competition He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making This authoritative study will be of interest to all those in the telecommunications industry including attorneys consultants and lobbyists who would like to know how the EU s policy developed It will appeal more generally to political scientists and scholars of European history and politics

EU Environmental Policies in Subnational

Regions Antje C.K. Brown, 2017-10-05 This title was first published in 2001 Despite the fact that environmental directives are one of the strongest areas of policy decreed by the EU it has a much poorer record when it comes to actual implementation of these policies Instead of focusing on the traditional state centrist accounts this book compares two subnational regions within the EU Scotland and Bavaria and their role in the policy process The author offers a multi layered implementation map which highlights three main government layers involved in the filtering process and identifies various formal and informal determinants which shape EU environmental policies during the process The book not only compares implementation performances between the two regions and their respective states but also compares the region s processes against the national processes thereby exposing determinants that would otherwise remain undetected In doing so it confirms that subnational regions feature determinants which differ in many respects from national determinants and influence the effectiveness of EU environmental policies The book contributes to a better understanding of the implementation deficit and presents a more refined picture of the EU environmental policy reality
