

Recommendations Report

Introduction

The County of Hawaii Mass Transit Agency (MTA) currently operates on a flagstop basis. With increased ridership, MTA is moving into a designated bus stop program. SSFM International, Inc. (SSFM) was contracted to identify locations for bus stops islandwide and to determine if locations warrant an official bus stop listed in the Hawaii County Code. Official bus stops will need to be Americans with Disabilities Act (ADA) compliant.

This document is the third report in a three part series outlining improvement recommendations for the existing transit system. The first report, "Inventory and Initial Screening Report," was previously delivered which consisted of a complete inventory of 575 existing bus stops islandwide. The second, "Data Base of Priority Stops," takes into consideration a variety of determining factors and identifies a list of 224 bus stop locations recommended for improvements.

This report contains recommendations for 89 stops which should be made official in the Hawaii County Code. The report is organized into six sections:

- 1.0 Recommendations for Official Bus Stops** - Official bus stops are ones that need to be approved and cited in the Hawaii County Code. This is necessary primarily in cases where a "No Parking Zone" needs to be established to make room for bus stops.
- 2.0 Recommendations for ADA Compliance** - In order for a bus stop to become an official Hawaii County Code listed stop, it must first comply with The Americans with Disabilities Act (ADA). ADA primarily serves as a standard of design guidelines to ensure that those with disabilities have access to the same public amenities as those of other riders. This section describes what needs to be done to bring each official stop into compliance.
- 3.0 Recommendations for Bus Pullouts** - Bus Pullouts are recommended for stops where safety and traffic conditions and space allow for a dedicated space for buses to pull completely off the road.
- 4.0 Amenities** - This section outlines amenities and improvement recommendations for all 224 priority stops.

Financial Analysts' Forecasts and Stock Recommendations Sundaresh Ramnath, Steve Rock, Philip B. Shane, 2008 Financial Analysts Forecasts and Stock Recommendations reviews research related to the role of financial analysts in the allocation of resources in capital markets The authors provide an organized look at the literature with particular attention to important questions that remain open for further research They focus research related to analysts decision processes and the usefulness of their forecasts and stock recommendations Some of the major surveys were published in the early 1990's and since then no less than 250 papers related to financial analysts have appeared in the nine major research journals that we used to launch our review of the literature The research has evolved from descriptions of the statistical properties of analysts forecasts to investigations of the incentives and decision processes that give rise to those properties However in spite of this broader focus much of analysts decision processes and the market's mechanism of drawing a useful consensus from the combination of individual analysts decisions remain hidden in a black box What do we know about the relevant valuation metrics and the mechanism by which analysts and investors translate forecasts into present equity values What do we know about the heuristics relied upon by analysts and the market and the appropriateness of their use Financial Analysts Forecasts and Stock Recommendations examines these and other questions and concludes by highlighting area for future research
