Audit Risk Alert AICPA, 2018-05-11 Developed by a task force consisting of current and former employee benefit plan expert panel members, this alert offers a range of topics such as master trust reporting, cybersecurity, new proposed auditor's reports, electronic information, limited scope certification, and new auditing standards such as PCAOB AS 3101. The increasing complexity of employee benefit plan auditing and increased focus by the DOL have resulted in significant pressure for CPAs and firms performing EBP audits. To help accountants meet the challenge of performing quality audits in this unique and complex area, the AICPA has developed this alert to assist them in identifying current sources of risk within EBP audit engagements. Accountants will find a targeted discussion on new developments, issues auditors may face in their current audits, as well as a look at what's in the pipeline that may affect your engagements. Key benefits of this work include: Coverage of emerging practice issues including direct versus indirect investment in fully benefit-responsive investment contracts, readily determinable fair value disclosures for investments in certain entities that calculate NAV per share or its equivalent, plan expenses and repurchase agreements. An in-depth look at master trust reporting, electronic information, and the new PCAOB auditing standard AS 3101. Analysis of high-risk areas specific to defined benefit pension plans such as pension benefit guaranty corporation premiums and reporting, demographic and economic assumptions, and pension risk management. Current developments on health and welfare plans including health care reform and its effect on employee benefit plans. Up-to-date information on regulatory development from both the DOL and IRS.

Practical Human Resource Information Systems SATISH K. BAGDI, 2012-05-09

Practical Guide to Human Resource Information Systems HRIS is a comprehensive presentation on global HRIS implementations and the associated challenges faced in such global projects. It begins with the basic HR and IT concepts and guides the readers through the complete life cycle of HRIS applications spanning from planning to execution. Both HR and IT play an equal role in the development of HRIS applications. This book will help students from both HR and IT streams in assimilating the intricacies of implementation of HRIS projects. HR is one of the most popular ERP product implementation topics in today's business world. Its implementation needs a practical discussion using examples from real world. The examples, the case study and discussions in the book follow an international approach rather than discussing only a single country HRIS implementations. A real life case study that flows through various chapters of the book brings out challenges in the implementation of HR specific projects. In today's global economy HR is changing fast and dives into areas such as strategy outsourcing, mergers and acquisitions, etc. This book covers all these areas and other topics that are relevant to today's HR world providing more value to the readers. It provides illustrations to assist readers in visualizing the topics discussed and in developing a sound understanding of the integration and data aspects of HRIS systems. This book will be useful as a text for a course in HRIS wherever prescribed for the MBA HR and MBA IT students. The book encourages self directed study and thought process based on references provided at the end of each chapter and hence will also be useful to consultants, HR professionals and IT professionals working with HR departments.
