those who've stood up against narrow curriculum and standardized testing for years in the capacity of both P 12 teachers and teacher educators. The voices of these educators illustrate how the work of disruptive STEM teaching can be actualized within cohorts of future teachers achieved through early engagement with critical theories and generative field experiences that support and affirm a wide array of identities. This book provides multiple theoretical and practical access points for the reader to understand the work of disruptive STEM teaching and offers a way forward for those interested in developing more critical curriculum in their own classrooms. As such, it will be important reading for postgraduate students and researchers in Social Justice Education and STEM Education as well as for in-service educators.
