Tilt? David Niven, 2002-09-30 Nine in ten Americans believe the media are biased Trust in journalists ranks beneath that in lawyers and even the media themselves regularly portray their own industry as slanted toward Democrats and liberals These perceptions however do not coincide with reality as David Niven reveals in his bold new take on an often debated subject *Tilt* The Search for Media Bias presents the first comprehensive review of the charges the evidence and the effects beginning with a simple but altogether overlooked premise to measure media bias or fairness one has to have a fair baseline with which to compare coverage Using situations in which presidents governors mayors and members of Congress from different political parties have produced the same results in office *Tilt* compares media coverage of Democrats and Republicans in situations in which they clearly

deserved equal treatment The lack of evidence for partisan media bias is only part of the story The media cover allegations of bias as if their industry has already been tried and convicted while the American people readily accepted the premise that their main sources of information are selfishly slanted toward reporters personal political agendas Niven s findings unmistakable and consistent reveal that when the output of politicians is the same media coverage follows a conclusion that is as provocative as it is timely and necessary Labor Relations Reference Manual ,1985 Vols 9 17 include decisions of the War Labor Board
