Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert, Arno Schlueter, 2016-08-15

Consuming over 40% of total primary energy the built environment is in the centre of worldwide strategies and measures towards a more sustainable future To provide resilient solutions a simple optimisation of individual technologies will not be sufficient In contrast whole system thinking reveals and exploits connections between parts Each system interacts with others on different scales materials components buildings cities and domains ecology economy and social Whole system designers optimize the performance of such systems by understanding interconnections and identifying synergies The more complete the design integration the better the result In this book the reader will find the proceedings of the 2016 Sustainable Built Environment SBE Regional Conference in Zurich Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment , **ICoRD'13** Amaresh Chakrabarti, Raghu V. Prakash, 2013-01-12 This book showcases over 100 cutting edge research papers from the 4th International Conference on Research into Design ICoRD 13 the largest in India in this area written by eminent researchers from over 20 countries on the design process methods and tools for supporting global product development GPD The special features of the book are the variety of insights into the GPD process and the host of methods and tools at the cutting edge of all major areas of design research for its support The main benefit of this book for researchers in engineering design and GPD are access to the latest quality research in this area for practitioners and educators it is exposure to an empirically
