Brookhart, 2013-01-11 What is a rubric A rubric is a coherent set of criteria for student work that describes levels of performance quality Sounds simple enough right Unfortunately rubrics are commonly misunderstood and misused The good news is that when rubrics are created and used correctly they are strong tools that support and enhance classroom instruction and student learning In this comprehensive guide author Susan M Brookhart identifies two essential components of effective rubrics 1 criteria that relate to the learning not the tasks that students are being asked to demonstrate and 2 clear descriptions of performance across a continuum of quality She outlines the difference between various kinds of rubrics for example general versus task specific and analytic versus holistic explains when using each type of rubric is appropriate and highlights examples from all grade levels and assorted content areas In addition Brookhart addresses Common misconceptions about rubrics Important differences between rubrics and other assessment tools such as checklists and rating scales and when such alternatives can be useful and How to use rubrics for formative assessment and grading including standards based grading and report card grades Intended for educators who are already familiar with rubrics as well as those who are not this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources And it makes the case that rubrics when used appropriately can improve outcomes by helping teachers teach and helping students learn

Solomon, 2002-06-14 Just the kind of bridge we need to span the ideological wars and make schools work for teachers and their students Ann Lieberman Senior Scholar Carnegie Foundation for the Advancement of Teaching Visiting Professor Stanford University In her supremely well written and useful book Dr Solomon has woven together historical perspective research and her own considerable experience to address reforming schools in the 21st Century After defining the problem productive change Dr Solomon has examined old solutions and conceptualized new ones to create better schools for students Nancy Goldman Director of Curriculum Pearl River School District Pearl River NY Standards and implementation of the learning process go hand in hand The Assessment Bridge makes us clearly aware of the present need for a bridge between the two so that standards may not create greater failure and the rejection of formal education by many children Matthew Foley Pastor Epiphany Roman Catholic Church We must ensure that tests serve the needs of education not force education to fulfill needs of test creators The Assessment Bridge is award winning educator Pearl Solomon's penetrating and cogent examination of today's high stakes standards based testing movement which seems to compromise effective teaching and learning rather than improve it Committed teachers know the importance of student assessment as a guide to classroom instruction Restoring assessment to its proper place in the
