

Policy Analysis Paper

Step 1 Determine the underlying problem

Introduce the problem you wish to research and analyze. Whether the issue is universal health care, improved educational achievement or campaign-finance reform, you should identify a specific issue and articulate why it is important. Establish a set of criteria for resolving the problem in question. For example, an increase in the number of people covered by health insurance represents a criterion for resolving the issue of the uninsured. Improved scores on standardized academic assessments and higher graduation rates from high schools would be criteria for improved achievement in education.

Step 2 Describe how problem arose

Place the issue in historical context by describing how the problem arose and outlining previous efforts, if any, to address the problem. To detail the issue and any prior policy responses, you can use a range of sources, including books, articles from scholarly journals, previous policy analyses, government reports, legislative materials and news articles. Summarize the results of prior policy efforts and identify the major stakeholders. These are the individuals and groups likely to affect or be affected by new government policies taken in response to the issue under discussion.

Step 3 Determine the objectives and Generate alternatives

Identify a set of policy options government might take to resolve the issue. Be sure the options involve substantive policy measures aimed at the issue in question. This is a policy analysis, not a manifesto outlining broader social, economic or political changes. Your research on the issue and past policy actions will help you identify policy proposals and create new approaches for addressing the identified problem.

Step 4 Predict consequences of each alternative/ Comparison of the policy alternatives

Compare the policy alternatives outlined in the previous step, applying the specified criteria. This forms the main body of your policy analysis research paper. Discuss how each alternative would meet the criteria for issue resolution identified in your introduction. Depending on the specific issue and the available data, compare policy alternatives with qualitative and quantitative methods of analysis. Quantitative methods are especially effective in weighing the anticipated costs and benefits of a policy proposal. Consider political factors as well; describe how the stakeholders would be affected by the various policy alternatives.

Step 5 Choose course of action

Recommend a policy action, based on your analysis of a set of alternatives. Articulate reasons, supported by facts and evidence, why the policy proposal you have chosen would be the best avenue from addressing the issue in question.
