Thau, 1989 **Builder 1 & C** Carl G. Bauer, 1983 Builder 1, 1989 **Naval Construction Force/SEABEE Petty Officer First Class Junior D. Sims**, 1990 Vietnam Fire Mission Larry Allen Hilton, 2025-11-30 Vietnam Fire Mission reflects on Larry Hilton's time in the U S Marine Corps initially enlisting at 18 with the belief that all Marines were infantrymen However upon completing boot camp he was assigned to artillery as a cannoneer MOS 0811 which was a significant surprise In this first hand account Hilton explains that artillery units while typically thought of as being behind the lines were often directly targeted during the Vietnam War where there were no front lines Artillery positions were frequently attacked by mortars snipers and enemy forces requiring Marines to defend themselves The author describes the initial confusion among Marines in 1965 as many had no knowledge of Vietnam before being abruptly deployed there Marines who had been stationed in the Pacific were quickly shipped to Vietnam with some arriving without their proper gear The deployment to Vietnam especially in the early stages caused frustration for those whose service was extended Reflecting on his own experiences the author recounts how the stress of war sometimes led to memory lapses For instance they struggled to recall the details of November 10 1966 despite it being the U S Marine Corps birthday only to later discover that they had participated in a ceremony in Vietnam

that day Hilton concludes that by acknowledging the challenges of recalling events accurately under the intense conditions of war he is able to share his story to the best of his ability to give the reader a glimpse in to one of the most contentious conflicts

Handbook of Water and Wastewater Treatment Plant Operations Frank R. Spellman, 2013-10-21

Handbook of Water and Wastewater Treatment Plant Operations the first thorough resource manual developed exclusively for water and wastewater plant operators has been updated and expanded An industry standard now in its third edition this book addresses management issues and security needs contains coverage on pharmaceuticals and personal care products PPCPs and includes regulatory changes The author explains the material in layman s terms providing real world operating scenarios with problem solving practice sets for each scenario This provides readers with the ability to incorporate math with both theory and practical application The book contains additional emphasis on operator safety new chapters on energy conservation and sustainability and basic science for operators What s New in the Third Edition Prepares operators for licensure exams Provides additional math problems and solutions to better prepare users for certification exams Updates all chapters to reflect the developments in the field Enables users to properly operate water and wastewater plants and suggests troubleshooting procedures for returning a plant to optimum operation levels A complete compilation of water science treatment information process control procedures problem solving techniques safety and health information and administrative and technological trends this text serves as a resource for professionals working in water and wastewater operations and operators preparing for wastewater licensure exams It can also be used as a supplemental textbook for undergraduate and graduate students studying environmental science water science and environmental engineering
