Transfer Model* , 1999 SB3D is a three dimensional atmospheric and oceanic radiative transfer model for the Solar spectrum
The microphysics employed in the model are the same as used in the model SBDART It is assumed that the user of SB3D is
familiar with SBDART and IDL SB3D differs from SBDART in that computations are conducted on media in three dimensions
rather than a single column i e plane parallel and a stochastic method Monte Carlo is employed instead of a numerical
approach Discrete Ordinates for estimating a solution to the radiative transfer equation Because of these two differences
between SB3D and SBDART the input and running of SB3D is more unwieldy and requires compromises between model
performance and computational expense Hence there is no one correct method for running the model and the user must
develop a sense to the proper input and configuration of the model
