Scrambling for Africa Johanna Tayloe Crane, 2013-09-15 Countries in sub Saharan Africa were once dismissed by Western experts as being too poor and chaotic to benefit from the antiretroviral drugs that transformed the AIDS epidemic in the United States and Europe Today however the region is courted by some of the most prestigious research universities in the world as they search for resource poor hospitals in which to base their international HIV research and global health programs In *Scrambling for Africa* Johanna Tayloe Crane reveals how in the space of merely a decade Africa went from being a continent largely excluded from advancements in HIV medicine to an area of central concern and knowledge production within the increasingly popular field of global health science Drawing on research conducted in the U S and Uganda during the mid 2000s Crane provides a fascinating ethnographic account of the transnational flow of knowledge politics and research money as well as blood samples viruses and drugs She takes readers to underfunded Ugandan HIV clinics as well as to laboratories and conference rooms in wealthy American cities like San Francisco and Seattle where American and Ugandan experts struggle to forge shared knowledge about the AIDS epidemic The resulting uncomfortable mix of preventable suffering humanitarian sentiment and scientific ambition shows how global health research partnerships may paradoxically benefit from the very inequalities they aspire to redress A work of outstanding interdisciplinary scholarship *Scrambling for Africa* will be of interest to audiences in anthropology science and technology studies African studies and the medical humanities

International Outreach Activities on Biosecurity,2009-06-07 The 2nd International Forum on Biosecurity held in Budapest Hungary on March 30 April 2 2008 represents the efforts of a number of individuals and organizations over the last five years to engage the international community of life scientists in addressing how to reduce the risk that the results of their work could be used for hostile purposes by terrorists and states The participants who gathered in Budapest were already engaged in this challenging task and therefore the focus of the meeting was on what had been accomplished and what challenges remained There was no attempt to achieve consensus since there exist real and important differences among those involved concerning the appropriate policies and actions to be undertaken But there was a serious effort to identify a range of potential next steps and also an effort to identify opportunities where international scientific organizations could make substantive contributions and offer their advice and expertise to policy discussions The Forum s presentations discussions and results are summarized in this book
