Directions: Read the following information, highlight and underline as you read. I recommend making index cards with the information below to test your knowledge. If you create 10 index cards with study information, or a study guide you made, I will give you +20 extra credit on your Mock Final (quiz).

Goal for NC Final Exam: _____

Time Management: Many students have good intentions for studying and preparing for a test, but without a plan, many will fall short of their goals. Here are some strategies for your study plan:

- Set realistic goals for what you want to accomplish during the holiday break
- Study during your most productive time of the day
- Study for reasonable amounts of time (marathon studying is not productive)
- Take breaks while studying
- Be consistent – establish a routine and stick to it!
- Reward yourself for a job well done ☺

Active Studying: Students who actively study will learn and retain information longer. What is active studying? It can be anything that gets you to interact with the material you are studying. For ex.:

- Carefully read the information and then DO something with it. Mark the important parts with a highlighter, circle them with a pen, write notes, or summarize in your own words
- Create sample test questions and answer them
- Find a friend and quiz each other

This second edition also features an online ancillary package allowing instructors to more effectively convey the concepts presented in the text and prepare students for careers in the field. Clinical Exercise Physiology Second Edition is easy to navigate; the logical order of the chapters makes key information easy to find. The detailed chapters discuss 23 disease states and conditions that clinical exercise physiologists encounter in their work and provide guidance for the expert care of the populations discussed. Each chapter covers the scope of the condition, its physiology and pathophysiology, and treatment options, clinical considerations including the administration of a graded exercise test and exercise prescription. The text also details how clinical exercise physiologists can most effectively address issues facing special populations, including children, the elderly, and female athletes. This comprehensive resource is an asset to new and veteran clinical exercise physiologists, as well as those preparing for the ACSM Registry Examination. A must-have study tool for examination candidates, this text is on the suggested readings lists for both the Exercise Specialist and Registered Exercise Physiology exams.
