

NYS LAB: Relationships and Biodiversity

A Laboratory Activity for the Living Environment

Introduction:

Monarda mollis is a native plant species of grassland. **2000** is considered good for studying certain parts of leaves. Considered for potential environmental. *Monarda mollis* grows very slowly, which is the challenge of growing this native plant in grassland. Consider for long-term study.

Monarda mollis is most closely related to *Monarda mollis* and most likely to produce the important adaptation. Consider. These native plant species that are present in the study may be related to *Monarda mollis*. You will need to understand the

- get the **relationship and evolutionary relationship** to determine which plant species is most closely related to the experimental species, *Monarda mollis*.
- use this evidence to decide which plant species is most likely to survive and is most likely the important adaptation.

Pre-Lab

Using the information from the previous introduction, explain the problems you are trying to solve in this lab and how you are going to solve it.

My hypothesis is that the plant species
