Serial Forms Clare Pettitt,2020-06-04 Serial Forms The Unfinished Project of Modernity 1815 1848 proposes an entirely new way of reading the transition into the modern It is the first book in a series of three which will take the reader up to the

end of the First World War moving from a focus on London to a global perspective Serial Forms sets out the theoretical and historical basis for all three volumes It suggests that as a serial news culture and a stadial historicism developed together between 1815 and 1848 seriality became the dominant form of the nineteenth century Through serial newsprint illustrations performances and shows the past and the contemporary moment enter into public visibility together Serial Forms argues that it is through seriality that the social is represented as increasingly politically urgent The insistent rhythm of the serial reorganizes time recalibrates and rescales the social and will prepare the way for the 1848 revolutions which are the subject of the next book By placing their work back into the messy print and performance culture from which it originally appeared Serial Forms is able to produce new and exciting readings of familiar authors such as Scott Byron Dickens and Gaskell Rather than offering a rarefied intellectual history or chopping up the period into Romantic and Victorian Clare Pettitt tracks the development of communications technologies and their impact on the ways in which time history and virtuality are imagined

**Thriving in an Academic Career** Michael Solem, Kenneth Foote, Shannon O'Lear, LaToya Eaves, Jongwon Lee, 2024-12-30 This book provides an invaluable guide on how to achieve a successful and fulfilling academic career Academics must balance multiple roles and responsibilities between teaching research and offering services to the department university and broader community This book provides practical research based guidance on how to adopt a healthy and balanced perspective that accounts for these interconnections Research shows that faculty who achieve early balance in their academic responsibilities and home life are more likely to succeed in all aspects of their career while strengthening the quality and climate of their programs and campuses This book's chapters accordingly feature case studies and examples that dig deeper into strategies and principles of holistic and balanced career practice and planning This book assists readers in understanding the relationships between their individual talents as teachers and scholars the obligations of their department as a community nested with others contributing to the university mission and the role and responsibility of their university and discipline in the wider society The themes of balance and harmony underpin this book's approach to faculty development Thriving in an Academic Career is for anyone beginning their academic career in geography and related social and environmental sciences at all types of higher education institutions This book will be of particular interest to graduate students and early career faculty in geography and nearby social environmental and natural sciences

*Quantization, Coherent States, and Complex Structures* J-P Antoine, S.T. Ali, W. Lisiecki, I.M. Mladenov, Anatol Odziejewicz, 2013-06-29 The XIIIth Bialowieza Summer Workshop was held from July 9 to 15 1994 While still within the general framework of Differential Geometric Methods in Physics the XnIth Workshop was expanded in scope to include quantum groups  $q$  deformations and non commutative geometry It is expected that lectures on these topics will now become an integral part of future workshops In the more traditional areas lectures were devoted to topics in quantization field theory group representations coherent states complex and Poisson structures the Berry phase graded contractions and some infinite

dimensional systems Those of us who have taken part in the evolution of the workshops over the years feel a good measure of satisfaction with the excellent quality of the papers presented in particular the mathematical rigour and novelty Each year a significant number of new results are presented and future directions of research are discussed Their freshness and immediacy inevitably leads to intense discussions and an exchange of ideas in an informal and physically charming environment The present workshop also had a higher attendance than its predecessors with approximately 65 registered participants As usual there was a large number of graduate students and young researchers among them
