Vital Record of Rhode Island James Newell Arnold,1894 **North and South Carolina Marriage Records** William Montgomery Clemens,1927 **Gathering at Silver Glen** Gilmore, Zackary I,2016-06-21 Broadening our understanding of southeastern hunter gatherers who lived between 4600 and 3500 BP Zackary Gilmore presents evidence that the Late Archaic community of Silver Glen one of Florida s most elaborate shell mound complexes integrated people and places from throughout Florida by staging large scale feasts and other public events Gilmore analyzes the composition and style of pottery at the site revealing that many of the large elaborately decorated vessels from the shell mounds were imports with nonlocal origins His findings indicate that the people of Silver Glen frequently hosted large scale gatherings that helped to create a sense of community among culturally diverse groups with homelands separated by hundreds of kilometers The history of Florida s Late Archaic hunter gatherers is shown here to be much more dynamic than traditionally thought

Disputed Inheritance Gregory Radick, 2023-08-18 A root and branch rethinking of how history has shaped the science of genetics In 1900 almost no one had heard of Gregor Mendel Ten years later he was famous as the father of a new science of heredity genetics Even today Mendelian ideas serve as a standard point of entry for learning about genes The message students receive is plain the twenty first century owes an enlightened understanding of how biological inheritance really works to the persistence of an intellectual inheritance that traces back to Mendel s garden *Disputed Inheritance* turns that message on its head As Gregory Radick shows Mendelian ideas became foundational not because they match reality little in nature behaves like Mendel s peas but because in England in the early years of the twentieth century a ferocious debate ended as it did On one side was the Cambridge biologist William Bateson who in Mendel s name wanted biology and society reorganized around the recognition that heredity is destiny On the other side was the Oxford biologist W F R Weldon who admiring Mendel s discoveries in a limited way thought Bateson s Mendelism represented a backward step since it pushed growing knowledge of the modifying role of environments internal and external to the margins Weldon s untimely death in 1906 before he could finish a book setting out his alternative vision is Radick suggests what sealed the Mendelian victory Bringing together extensive archival research with searching analyses of the nature of science and history *Disputed Inheritance* challenges the way we think about genetics and its possibilities past present and future
