State of the Art in AI Applied to Ambient Intelligence Juan Carlos Augusto,Andrea Orlandini,2017-10-15 We are moving towards a future where environments respond to human preferences and needs In this world smart devices equipped with intelligent features and the capability to sense communicate with and support humans in daily activities will be unremarkable We already expect our cars to warn us of hazards track our location and provide timely route advice and in future we will speak to simple machines and hold conversations with more complex systems such as intelligent homes which will help us to monitor conditions track routine tasks and program the heating lighting garden watering and entertainment centre But questions have been raised in recent years as to how intelligent these so called smart systems or ambient intelligence environments really are This book State of the Art in AI Applied to Ambient Intelligence part of the outcome of the Workshop on Artificial Intelligence Techniques for Ambient Intelligence AITAmI which has now run for 10 consecutive editions aims to

provide a clear picture of what has been achieved after a decade of discussion It is representative of the diversity of approaches and issues which are currently being considered and also indicates those avenues which are the most promising for exploration in the next decade The book provides all those working in the field with an up to date reference where they will find inspiration to create better systems for the society of tomorrow

Critiquing Generative AI in Africa's Media Ecosystems Lungile A. Tshuma, Trust Matsilele, 2025-11-17 This book takes a critical approach to the rise of Artificial Intelligence AI within the media and communication landscape The book argues that as technology is a social construct reflecting existing power dynamics those in the Global South and in Africa in particular are bound to be marginalised and have their knowledge systems overlooked as the Global North dominates technological developments The birth of AI has ignited debates about its benefits to lower income countries with some highlighting its potential to advance businesses and grow economies However this book argues that AI tools have been produced to serve Western needs and that instead there is a need for countries in Africa to have home grown solutions defined by local values Drawing on case studies and analysis from across the continent the book seeks to caution challenge and proffer solutions to the use and understanding of Generative AI for media and communication in non western societies At a time when generative AI is threatening to shape the future of media and communication around the world this book is a vital and timely contribution to debates within critical data studies and African media studies
