Shepard,1995 **Researching Mathematics Classrooms** Simon Goodchild,Lyn English,2002-12-30 Critique of research methods and methodology is one of several key features of the regular dialogue between researchers This critique takes place formally at conferences and seminars and regularly in universities Published critique is normally separated from the original work This book brings together the writing of researcher and independent critique Thus the book exposes to wider scrutiny the dialogue that exists between researchers It will be of interest to all who are concerned to understand the nature and substance of this critique The volume comprises a collection of accounts of classroom studies each complemented by the reaction of an eminent researcher The accounts and reactions are written to expose the nature of methodology of classroom research It argues that methodology encompasses the choice of methods and the researchers beliefs and values RtI in Math Linda Forbringer,Wendy Weber,2014-01-03 Learn how to help K 8 students who struggle in math This book provides a variety of clear practical strategies that can be implemented right away to boost student achievement You will find out how to design lessons that work with struggling learners implement the recommendations for math intervention from the What Works Clearinghouse use praise and self motivation more effectively develop number sense and computational fluency teach whole numbers and fractions increase students problem solving abilities and more Extensive examples are provided for each strategy as well as lesson plans games and resources **Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences** Philip Hui Li,Anne Forbes,Weipeng Yang,2023-12-11 This book informs best practice for enhancing young children s STEM learning experiences in formal settings such as preschool environments and less formal settings such as home environments It is the first collection of multidisciplinary and multinational studies on early STEM programs worldwide and presents diverse authentic and current STEM relevant scenarios that address two fundamental problems where are we in early STEM education and where shall we go The book explores factors that influence young learners abilities to make informed choices in authentic problem based STEM relevant scenarios and how those abilities have been identified documented and enhanced Chapters address topics related to curriculum and pedagogy teacher education and professional development family environment and inclusive education from a variety of international settings including Australia Germany Hong Kong Mainland China Singapore and the United States Each chapter is based around a research project and describes relevant background information from the research literature details of how the study was designed findings from the study and discussion as to what the findings mean for practical implementation Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences will be a key resource for researchers and practitioners of early childhood education and care STEM education educational psychology educational research and educational technology This book was originally published as a special issue of the journal Early Education and Development **Views and Beliefs in Mathematics Education** Carola Bernack-Schüler,Ralf Erens,Timo Leuders,Andreas Eichler,2015-05-05

International mathematics education researchers give a differentiated overview of views and beliefs of both teachers and students. Beliefs about how to teach mathematics have a high impact on the instructional practice of teachers. In the same way, views and beliefs about mathematics are an essential factor to explain achievement and performance of students. The 19th MAVI conference added a variety of research perspectives to the international discussions of mathematics-related beliefs. The authors of this volume have compiled a rich selection of research results which may further enhance the discussion of MAVI topics in the future.

Second Handbook of Research on Mathematics Teaching and Learning

Frank K. Lester, 2007-02-01. The audience remains much the same as for the 1992 Handbook, namely mathematics education researchers and other scholars conducting work in mathematics education. This group includes college and university faculty, graduate students, investigators in research and development centers, and staff members at federal, state, and local agencies that conduct and use research within the discipline of mathematics. The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work. The Handbook should also be a useful textbook for graduate research seminars. In addition to the audience mentioned above, the present Handbook contains chapters that should be relevant to four other groups: teacher educators, curriculum developers, state and national policy makers, and test developers and others involved with assessment. Taken as a whole, the chapters reflect the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community.

The Formative 5 in Action, Grades K-12 Francis (Skip) Fennell, Beth McCord Kobett, Jonathan A. Wray, 2023-06-27. Leverage formative assessment in mathematics every single day. For fans of the bestselling book *The Formative 5: Everyday Assessment Techniques for Every Math Classroom*, comes this updated and expanded edition for understanding and implementing highly effective, research-backed formative assessment techniques into seamless daily practice with students in grades K-12. *The Formative 5 in Action* serves as an interactive guide that steers teachers toward successful implementation of the formative five techniques of observation, interviews, show-me, hinge questions, and exit tasks. This updated guidebook offers more than 120 minutes of video examples of the five techniques in action in real K-12 classrooms, showing teachers not just what to do but how to do it. An engaging format with built-in reflection exercises and activities that foster individual professional learning and promote PLC study through discussion and collaboration. An explicit emphasis on providing effective and timely feedback to students while harnessing student strengths throughout teaching and learning. Comprehensive responses to teachers' frequently asked questions that have surfaced since the publication of the first book. The research is clear: the authors' five formative assessment techniques lead to greater attention to planning stronger instruction for teachers and better achievement for students. *The Formative 5 in Action* is a truly engaging resource that helps mathematics teachers and instructional leaders engage in classroom-based formative
