

Opening Remarks at the Miss India Holland Pageant
Sunday, 5th December 2010

Dear Friends,

1. It is with great pleasure that I accepted the kind offer to be a Special Guest at the Miss India Holland Pageant. This is an unique event which is not only a beauty pageant but a pageant in which Indian ladies present their culture. It is symbolic of how Indian culture is represented here in the Netherlands. The lucky winner will participate in the Miss India world wide Pageant to be held in Dubai, UAE, next year.

2. It would therefore be appropriate to recall the place of women in our history and civilizations going back to Millenia. Women have a unique place in Indian culture including the inter-linkage with nature. It is for this reason that we say Mother Earth, Mother India, Maa Ganga etc. Indian culture has been sustained for more than 5000 years primarily because of the role of women. All of you are familiar with the role of women in Indian mythology but perhaps it is important to recall that even in the last century Margaret Noble became Sister Nivedita and disseminated the word of Vivekananda while the Mother was a spokesperson for Aurovindo. The Indian woman has traditionally been equated with "Shakti" - "Power" derived from the Sanskrit word of "Power" or "Energy". Shakti represents creation, fire, the brilliance of the Sun and the very life force of all living beings. She also represents intelligence (Buddhi), compassion (Daya) and divine love (Bhakti) among her many functions. The women we see here today symbolize the Indian women in all these different manifestation. Feminism came to India thousands of years ago. Indeed, part of the Rig Veda (2250-1500 B.C.) is known as "Devi Sukta" and symbolizes recognition of Shakti as a cosmic principle. Throughout history, the Indian woman played this twin role of beauty and compassion on one hand and intelligence on the other. This is what makes the Indian women unique!

An Introduction to Website

Performance John Rhea, 2023-05-01 Having trouble outrunning the zombie horde? Is your website so slow the remnants of humanity flee before it even loads? In this book, we'll discuss many different ways to make your website faster. These ways fall into three general strategies: reducing what's sent to the user, speeding up smoothing the website's rendering, and reducing processing and download time. Within those three strategies, there are a variety of zombie-smashing tactics that can each shave a bit off the time it takes to show your website. Some tactics won't be worth the trade-offs or won't be feasible within your particular setup, but we'll discuss each of them, the pros and cons of their use, and when implementation doesn't depend on particular server software or hardware, we'll show you how to do it too, even if it does require details about your particular setup. We'll give you enough information to help you know where to start. This book is a great starter on your performance journey, showing you plenty of easy-to-implement, low-hanging zombies that you can pick off to quickly make your site faster.

An Introduction to Transfer Entropy Terry Bossomaier, Lionel Barnett, Michael Harré, Joseph T. Lizier, 2016-11-15 This book considers a relatively new metric in complex systems: transfer entropy, derived from a series of measurements, usually a time series. After a qualitative introduction and a chapter that explains the key ideas from statistics required to understand the text, the authors then present information theory and transfer entropy in depth. A key feature of the approach is the authors' work to show the relationship between information flow and complexity. The later chapters demonstrate information transfer in canonical systems and applications, for example, in neuroscience and in finance. The book will be of value to advanced undergraduate and graduate students and researchers in the areas of computer science, neuroscience, physics, and engineering.
