When you install your T-Value One Coverstitching, improper installation of all four corners (90° corners) on the One Coverstitching is the most common mistake, which causes the One Coverstitching to pull away from the corners. To ensure proper installation, making the machine proper installation may result in a variety of problems with the product.

- When a manufacturer's price for the product is not in general equilibrium, an efficiency improvement (producer's cost falls) is offset by "increasing the price to the consumer" (raising the price) generated by the market. The result is that the price paid by the consumer is not lower, and the product is not sold in equilibrium in the competitive market.
