Why have seemingly similar African countries developed very different forms of democratic party systems? Despite virtually ubiquitous conditions that are assumed to be challenging to democracy—low levels of economic development, high ethnic heterogeneity, and weak state capacity—nearly two dozen African countries have maintained democratic competition since the early 1990s. Yet the forms of party system competition vary greatly from highly stable, nationally organized, well-institutionalized party systems to incredibly volatile, particularistic parties in systems with low institutionalization. To explain their divergent development, Rachel Beatty Riedl points to earlier authoritarian strategies to consolidate support and maintain power. The initial stages of democratic opening provide an opportunity for authoritarian incumbents to attempt to shape the rules of the new multiparty system in their own interests, but their power to do so depends on the extent of local support built up over time. *Resources in Education*, 1998. Examining Young Learners: Research and Practice in Assessing the English of School-age Learners Szilvia Papp, Shelagh Rixon, 2018. The proposed book on child second language (L2) development and assessment will be a state-of-the-art account of what we currently know about how children learn L2s in formal contexts and how that knowledge impacts on the design, development, and evaluation of language assessment products for young learners. The uniqueness of child L2 development within the classroom is highlighted by considering children's L2 needs, typical patterns of development, and the role of instruction and assessment in how children learn. Common issues shared in child L2 acquisition studies—language testing and educational assessment—are explored by linking research carried out within the educational, academic, and testing communities. Several case studies are described from different educational contexts around the world where teaching and assessment of young language learners takes place. In particular, the book presents the Cambridge English approach to assessing young learners of English and presents a framework for the development, research, and validation activities around the Cambridge English suite battery for
