Information, Committee on Toward an Open Science Enterprise, 2018-09-09 Openness and sharing of information are fundamental to the progress of science and to the effective functioning of the research enterprise. The advent of scientific journals in the 17th century helped power the Scientific Revolution by allowing researchers to communicate across time and space using the technologies of that era to generate reliable knowledge more quickly and efficiently. Harnessing today's stunning ongoing advances in information technologies, the global research enterprise and its stakeholders are moving toward a new open science ecosystem. Open science aims to ensure the free availability and usability of scholarly publications, the data that result from scholarly research, and the methodologies including code or algorithms that were used to generate those data. Open Science by Design is aimed at overcoming barriers and moving toward open science as the default approach across the research enterprise. This report explores specific examples of open science and discusses a range of challenges focusing on stakeholder perspectives. It is meant to provide guidance to the research enterprise and its stakeholders as they build strategies for achieving open science and take the next steps.

People Living with Disabilities in South African Cities Hangwelani Hope Magidimisha-Chipungu, 2024-10-22 This book offers a unique and much needed perspective on disability and accessibility in urban context in South Africa. Drawing on lived experiences of disabled people, it documents the multidimensional aspect of poverty in the context of disability and built environment to show how poorly planned cities create physical and social barriers that impact the life of people with disabilities. *People Living with Disabilities in South African Cities* is structured around three main insights and themes that inform the author's approach to disability and cities. The first is disability research drawing on studies on planning and the built environment; the author highlights the role of physical environment in promoting inclusion and accessibility for people with disabilities. The second theme is social protection, i.e. ways to provide support and resources for people with disabilities to enable them to participate fully in society. Finally, the author explores the policies and legislative context needed to create an inclusive society, challenging the role of governments and policy makers. Offering a comprehensive approach to studying disabilities and cities, the author aims to bridge the gap between disability studies, inclusive planning, and design to support the development of accessible cities in the African context. This invaluable book not only raises awareness on social inclusion but also offers an invaluable guide to policy makers across the Global South to tackle and address inequalities.

Transportation and Public Health M. D. Meyer, O. A. Elrahman, 2019-06-15 *Transportation and Public Health: An Integrated Approach to Policy Planning and Implementation* helps current and future transportation professionals integrate public health considerations into their transportation planning, thus supporting sustainability and promoting societal health and well-being. The book defines key issues, describes potential solutions, and provides detailed examples of how solutions have been implemented worldwide. In addition, it demonstrates how to identify gaps in existing policy frameworks. Addressing a critical and emerging urgent need in transportation and public health research, the book creates a coherent, inclusive, and interdisciplinary framework for understanding. By integrating
