

English Research Paper: Overview

Objective One

Distributed: Wednesday, February 2, 2011

Due: Friday, February 4, 2011

The English Research Paper is the culminating project and assessment of all the writing, reading, and research techniques you have accumulated throughout the course of the year. This vital and pivotal piece of the curriculum affords an opportunity to demonstrate the ability to read, write, speak, apply knowledge, problem solve, and use a myriad of life skills such as time management, organization, and risk-taking and will occur from March until May. The two (2) components of the project are as follows:

Research Paper

The student will self-select and research a topic in which he/she has an interest. The culmination of the research work is a 1250 word (4-5 text pages) research paper organized around a clearly stated thesis and adhering to standard documentation forms (MLA Handbook) and standard manuscript guidelines. Submitted in the fourth marking period, the research paper and standard manuscript grades will appear in the student's fourth marking period Assessment category of grades. The paper will count for 200 points in the Assessment category. **The paper is due on Friday, April 15, 2011 and must be posted on turnitin.com.**

Oral Presentation and Defense

The student will present his/her project to the class. This is not a reading of the paper but a dynamic presentation of the work using visual aids, constructed models, videos, or any other approved media. The student must interact with the class and teacher during the presentation. The Oral Presentation will take place during the fourth marking period and will be reflected in the fourth marking period Assessment categories of grades. The speech will count for 200 points in the Assessment category. **The presentations will take place from May 17-20, 2011.**

Note

In order for this process to be a successful learning experience, this Objectives Packet enables the student to approach this project in a measured way, with each component having a separate due date. Language, research, speaking, and writing assignments given to students during the course of the semester afford opportunities to practice and to perfect further the skills necessary to successfully meet the objectives required to successfully complete the research paper. Students and parents should note that students and their families can locate information, extra copies, and models for all of the needed research requirements on our class website.

Although we will have many opportunities to visit the library in school and to work on writing during class, students are expected to work independently at home and during study halls, if needed. Please also consider that academic programs will still be occurring; therefore, students should manage their time wisely in order to prepare for quizzes, exams, and other academic responsibilities that may be unrelated to the research project.

Does God Belong in Public Schools? Kent Greenawalt, 2009-01-10 Controversial Supreme Court decisions have barred organized school prayer but neither the Court nor public policy exclude religion from schools altogether In this book one of America s leading constitutional scholars asks what role religion ought to play in public schools Kent Greenawalt explores many of the most divisive issues in educational debate including teaching about the origins of life sex education and when or whether students can opt out of school activities for religious reasons Using these and other case studies Greenawalt considers how to balance the country s constitutional commitment to personal freedoms and to the separation of church and state with the vital role that religion has always played in American society Do we risk distorting students understanding of America s past and present by ignoring religion in public school curricula When does teaching about religion cross the line into the promotion of

religion Tracing the historical development of religion within public schools and considering every major Supreme Court case Greenawalt concludes that the bans on school prayer and the teaching of creationism are justified and that the court should more closely examine such activities as the singing of religious songs and student papers on religious topics He also argues that students ought to be taught more about religion both its contributions and shortcomings especially in courses in history To do otherwise he writes is to present a seriously distorted picture of society and indirectly to be other than neutral in presenting secularism and religion Written with exemplary clarity and even handedness this is a major book about some of the most pressing and contentious issues in educational policy and constitutional law today *Constructional and Cognitive Explorations of Contrastive Linguistics* Annalisa Baicchi,Cristiano Broccias,2024-02-22 This book approaches the field of contrastive linguistics from a comparative and robust perspective that combines the tenets of construction grammar and cognitive linguistics In doing so it shows how their integration can help to successfully enhance research on contrastivity by means of updated theoretical frameworks and applied methodologies that combine language and thought It compares ten different languages and offers analyses of constructions at all levels of the linguistic organization identifying the cognitive motivations that instantiate the linguistic data retrieved from corpora Relevant to both cognitive and non cognitive linguists interested in variation and contrastive approaches as well as graduate students in these areas this book makes a significant contribution to existing work on the various types of constructional and discourse based phenomena in modern languages

Envisioning the Future of Online Learning Johan Eddy Luaran,Janudin Sardi,Anealka Aziz,Nor Aziah Alias,2016-06-10 This book shares insights into the various ways technology can be used for educational purposes utilizing an approach suitable for both novice and advanced practitioners in this niche area It features selected papers presented at the International Conference on e Learning 2015 ICeL 2015 where professionals discussed how technology can not only serve as a tool in the classroom but as the classroom itself As the title Envisioning the Future of Online Learning suggests this book showcases current best practices in the field of e learning where technology has been leveraged to re engineer the landscape of education particularly in the context of Malaysia *Sustainable Value Management-New Concepts and Contemporary Trends* Dariusz Zarzecki,Marek Jabłoński,2020-12-29 Sustainable value management reveals a new space for studying business models The traditional approach is based on the assumption that the goal of any business is to make money All decisions regarding supply and production should be made to maximize profit The discrepancy in creating non economic value is sometimes the result of separating ownership from control over an enterprise Although shareholders are interested in maximizing profit management that actually makes decisions can also pursue other goals In addition to economic aspects the management intentions of modern managers are also influenced by factors arising from the organizational culture built co created within the organization and sometimes with the participation of external actors such as suppliers and customers The sources of the creation of social values will be the management intentions of top management often initiated by the

adopted values and rules on the basis of which resources are bound within the structure of the business model The value of sustainability is based on the identification of those creative sources that relate to economic and social value Economic value is created through social value and vice versa This allows the complementarity of the value created to be mutually supportive The business model that integrates both of these values should be more resistant to crises than the one that is oriented only toward producing economic value Concurrent implementation of economic and social goals increases resilience and affects the success of modern business models This is due to the specificity of the business ecosystem that is built as part of the business model which in essence is based on the use of social factors to merge the business model into a complex ecosystem capable of producing value
