

Ocean Zones

Picture, illustration, info, activities

The **Sunlight Zone** is the top layer of the ocean, stretching from the surface down to about 200 meters (656 feet). It gets the most sunlight, making it warm and full of life. Plants like seaweed and tiny phytoplankton create life here. This zone is home to many marine animals, including fish, sharks, and dolphins. Since the Sun's light comes from the surface, many bright colors are found here.

Dolphins are mammals and need to come to the surface to breathe air through their blowholes. They also rely on sunlight to spot prey and communicate with each other using clicks and whistles. Dolphins eat fish, squid, and crustaceans like shrimp and crabs.

Many ocean animals, including jellyfish, and some come in to see people.
