

# Study Guide: Physical and Chemical Oceanography

## Effective composition of seawater is determined by:

- 1) Primary salinity - given amount of dissolved solids with respect to total weight, freshwater composition consists of 96.5% water and 3.5% solids
- 2) Source - water moving through salt balance from atmosphere through evaporation and precipitation, and ice melting/refreezing, resulting in different salinities, fresh water and sea water composition
- 3) Secondary salinization process - physical/chemical processes, biologically induced changes and changes in chemical composition occur over the entire ocean surface at once.

## Effective salinity and composition in salinity:

- 1) Equivalent - same composition, same weight
- 2) Equivalent - same composition, same weight, same volume

## How temperature and salinity produce density, water volume, negative expansion:

### Temperature differences alone cause density:

- 1) warm water is less dense than cold water is more dense
- 2) warm, less dense water is floating on a colder, denser water mass
- 3) when the temperature difference persists in the ocean, density is affected so as the circulation.

### Salinity differences cause density:

- 1) water with a saltier composition is denser than water with less salt
- 2) water with higher salinity, and lower density, floats above water with higher salinity
- 3) density (mass/volume) increases as salinity increases (mass/volume)
- 4) the higher the salinity, the higher the density, so the higher the density, the higher the salinity.

### Effect:

How temperature and salinity differences are related to the density of the water.

### Temperature effects:

on the left, warm, less dense water rises, cold water sinks.

### Salinity effects: - the difference in weight between the water and the salt.

### Effect:

Warm water rises, cold water sinks, so the water is denser, so the water is denser.

### Salinity effects: - the difference in weight between the water and the salt.

on the left, warm, less dense water rises, cold water sinks.
