Uglea, 2013-05-29 Over the last few decades numerous nanoparticle platforms have been studied for their use in therapeutic applications This book deals with the description of the construction of technical systems that combines different functionalities which bring liposomes polymer drug conjugates polymer protein conjugates dendrimers polymeric micelles polymerosomes and other nanoparticles into the realm of nanotechnology proper as opposed to traditional pharmacology or supramolecular chemistry The volume additionally covers topics such as passive and active targeting the strategies used for drug targeting and the synthesis and characterization of polymeric nanoparticle platforms Targeted polymeric

nanomedicines have shown exciting results in preclinical studies demonstrating their potential as therapeutic carriers. Therefore the development of polymeric nanomedicines as therapeutic agents has generated great enthusiasm both in academia and industry. The book is systematically divided into chapters devoted to a class of polymeric nanomedicines. Each chapter also describes relevant aspects relating to drug design and targeting of polymeric nanomedicines wherever possible. In addition a series of chapters concerning the contribution of polymeric nanomedicines in the treatment of several categories of diseases including cancer inflammatory renal immunological diseases and brain disorders is also presented. Key features of this book include: A comprehensive and cutting edge overview of polymeric nanomedicines available in a single dedicated volume. Discussions on advances in drug delivery systems for a variety of diseases. More than 2000 references, tables, equations and drawings. Readers whether beginners or experts will find in this book contemporary and relevant information regarding the synthesis, evaluation and applications of polymeric nanomedicines. Supplemented with extensive bibliographic references, tables and figures, this book is an essential and incomparable reference for medicinal chemists, biologists and medical oncologic researchers as well as for scientists, undergraduate and graduate students in the field of medical bioengineering and polymer nanoscience.
