

# Ecological Succession

## Matching

Match the different attributes of ecological succession to its correct definition.

Ecological Succession	the last stage of succession.
Primary succession	a gradual and natural change in an ecosystem over hundreds and thousands of years.
Secondary succession	takes place where organisms were not previously present.
Pioneer species	takes place where an existing ecosystem has been disturbed.
Climax community	are the first organisms to grown in a bare area, such as on bare rocks.

## Succession

Ecological succession = the replacement of one ecological community with another after a disturbance
