Discovered, Not Designed: Building Things in the Age of Complexity Sean McClure, 2024-06-25 To build is to be human Creating things is part of our nature and our principal mode of survival The things we have built throughout history have always relied on design to turn discoveries into workable tools But the underlying premise of design is that we can reason about the pieces and connections that make a thing work From the stone axe to the rocket engine design is predicated on our ability to see causal connections between the parts of a system But what happens when such causality is no longer apparent When the things we must build to solve our challenges have inner workings that cannot be discerned The answer lies in nature Nature fashions truly complex objects that solve categorically hard problems Complex things produce their most important outputs via emergence whereby a system's structures and behaviors arise in ways that cannot be designed This book argues that we are entering an age where humanity must build truly complex things to continue our progress This means learning to build as nature builds and as it turns out forces us to redefine knowledge and skill and more broadly our scientific and engineering paradigm Simulated Evolution and Learning Kalyanmoy Deb, Arnab Bhattacharya, Nirupam Chakraborti, Partha Chakroborty, Swagatam Das, Joydeep Dutta, Santosh K. social status like money or marriage and that knowledge is primarily the possession of groups rather than individuals Part I develops a new theory of testimony It breaks with the traditional view according to which testimony is not except accidentally a generative source of knowledge One important consequence of the new theory is a rejection of attempts to globally justify trust in the words of others Part II proposes a communitarian theory of empirical knowledge Martin Kusch argues that empirical belief can acquire the status of knowledge only by being shared with others and that all empirical beliefs presuppose social institutions As a result all knowledge is essentially political Part III defends some of the controversial premises and consequences of Parts I and II the community dependence of normativity epistemological and semantic relativism anti realism and a social conception of objectivity Martin Kusch's bold approach to epistemology is a challenge to philosophy and will arouse interest in the wider academic world Abstraction, Reformulation, and Approximation Berthe Y.
