**Etymological and Pronouncing Dictionary of the English Language** James Stormonth, 1901

**Language Processing and Language Acquisition** Lyn Frazier, J. de Villiers, 2012-12-06 Studies of language acquisition have largely ignored processing principles and mechanisms Not surprisingly questions concerning the analysis of an informative linguistic input the potential evidence for grammatical parameter setting have also been ignored Especially in linguistic approaches to language acquisition the role of language processing has not been prominent With few exceptions e.g Goodluck and Tavakolian 1982 Pinker 1984 discussions of language performance tend to arise only when experimental debris the artifact of some experiment needs to be cleared away Consequently language processing has been viewed as a collection of rather uninteresting performance factors obscuring the true object of interest namely grammar acquisition On those occasions when parsing strategies have been incorporated into accounts of language development they have often been

discussed as vague preferences not open to rigorous analysis In principle however theories of language comprehension can and should be subjected to the same criteria of explicitness and explanatoriness as other theories e g theories of grammar Thus their peripheral role in accounts of language development may reflect accidental factors rather than any inherent fuzziness or irrelevance to the language acquisition problem It seems probable that an explicit model of the way s processing routines are applied in acquisition would help solve some central problems of grammar acquisition since these routines regulate the application of grammatical knowledge to novel inputs
