**China, India and Southeast Asia**

Edmund Terence Gomez, Kee Cheok Cheong, Vamsi Vakulabharanam, 2018-12-07 This volume studies the outcomes of the two way flow of investments and people between China and India and Southeast Asia These cross border flows have led to new settlements in Southeast Asia from which new outlooks have emerged among locally born generations that have given rise to new forms of solidarity and identification The advent of new generations of ethnic Chinese and Indians in Southeast Asia with no ties to China or India has spawned important debates about identity shifts which have not been registered by government leaders in Southeast Asia China and India as reflected in policy statements and investment patterns Identity changes are assessed in forms where they best manifest themselves in social life and in business ventures forged or unsuccessfully nurtured through tie ups involving foreign and domestic capital A state society distinction is employed to determine how the governments of these rapidly developing countries envision development through state intervention as well as with the employment of highly entrepreneurial ethnic groups and the outcomes of this on their societies and on their economies The chapters were originally published as a special issue in *The Round Table*

***Climate Change and Sustainable Cities*** Hugo Priemus, Simin Davoudi, 2016-04-08 Climate change has demonstrated perhaps more than any other environmental concerns the complexities of the human nature interrelationship and the need for embedding a far greater environmental consciousness into our social values and norms A drastic reduction in global greenhouse gas emissions requires a transition to low carbon cities This demands a better understanding of the interactions between social technical and spatial processes which constitute cities The aim of this book is to explore these interactions and urge urban planners and other built environment professionals to revisit some of their traditional concepts methods and ways of thinking about what constitutes a good city and according to whose priorities The book brings together nine contributions ranging from broad overviews to sector specific analysis paying particular attention to the role of urban planning Contributors cover climate change mitigation and adaptation deal with different scales of analysis ranging from international and European to national and city perspectives and discuss a range of policy sectors including housing transport energy sea level rise as well as pathways for climate policy implementation The diversity of the contributions is itself a reflection of the multitude of climate change concerns that preoccupy researchers policy makers and practitioners This book was published as a special issue of *European Planning Studies*
