Bonnet,2019-01-15

This study of the subtlety complexity and variety of modes of hearing maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped by the vicissitudes of desire and discourse Profoundly intimate yet immediately giving onto distant spaces both an organ of fear and an echo chamber of anticipated pleasures an uncontrollable flow subject to unconscious selection and augmentation the subtlety complexity and variety of modes of hearing has meant that sound has rarely received the same philosophical attention as the visual In The Order of Sounds Francois J Bonnet makes a compelling case for the irreducible heterogeneity of sound navigating between the physical models constructed by psychophysics and refined through recording technologies and the synthetic production of what is heard From primitive vigilance and sonic mythologies to digital sampling and sound installations he examines the ways in which we make sound speak to us in an analysis of listening as a plurivocal phenomenon drawing on Foucault Deleuze and Guattari Barthes Nancy Adorno and de Certeau and experimental pioneers such as Tesla Bell and Raudive Stringent critiques of the soundscape and reduced listening demonstrate that univocal ontologies of sound are always partial and politicized for listening is always a selective fetishism a hallucination of sound filtered by desire and convention territorialized by discourse and its authorities Bonnet proposes neither a disciplined listening that targets sound itself nor an ocean of sound in which we might lose ourselves but instead maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped and aggregated by the vicissitudes of desire and discourse **Sound Objects** James A.
