**Modern Military Geography** Francis Galgano, Eugene J. Palka, 2012-02-06 This book of contributed chapters by subject matter expertly provides an overview and analysis of salient contemporary and historical military subjects from the military geographer's perspective. Factors of geography have had a compelling influence on battles and campaigns throughout history; however, geography and military affairs have gained heightened attention during the past two decades and military geography is the discipline best situated to explain them. Hence the premise of this book and its contents are founded on the principle that geographical knowledge of space, place, people, and scale provide essential insights into contemporary security issues and promotes the idea that such insight is critical to understanding and managing significant military problems at local, regional, and global scales.

**Australian National Bibliography**, 1994-05 Disaster Education, Communication and Engagement Neil Dufty, 2020-06-08 A detailed guide to the design and evaluation of effective disaster learning programs. Disaster Education, Communication and Engagement provides a much needed evidence based guide for designing effective disaster learning plans and programs that are tailored to local communities and their particular hazard risks. Drawing on the most recent research from disaster psychology, disaster sociology, and education psychology, as well as evaluations of disaster learning programs, the book contains practical guidance for putting in place a proven design framework. The book outlines the steps to take in order to tailor a disaster education, communication, and engagement program and highlights illustrative examples of effective programs and activities from around the world. The author includes information on how to identify potential community learners and presents a methodology for understanding the at-risk community, its hazard risks, disaster risk reduction, and emergency management arrangements. Disaster Education, Communication and Engagement describes both country-wide campaigns and local disaster programs that involve community participation. This important resource presents a detailed framework to guide the design and evaluation of tailored disaster learning programs. Includes information that links disaster resilience with sustainability and climate change learning. Describes the disaster cycle and reviews learning content and methods related to the cycle. Explains effective ways to combine disaster education, disaster communications, and disaster related engagement. Contains material on using new technologies such as gamification, virtual reality, and social media. Written for emergency managers, students of emergency management, and humanitarian courses. Disaster Education, Communication and Engagement is a hands-on guide filled with ideas and templates for designing and evaluating targeted disaster learning programs.

The Political Economy of Bilateral Aid Peter Blunt, 2022-12-23 The social and economic consequences of the COVID-19 pandemic and of extreme climate events have brought into sharp relief the serious deficiencies of our political economies. The dominant global ideology of neoliberalism and its architects and beneficiaries are responsible for this. Bilateral development assistance is an integral part of the neoliberal grand design. However, while the deficiencies of neoliberalism have been starkly exposed by the pandemic, its collapse is unlikely in the

short term Much bilateral assistance will therefore continue to be self serving Within these confines and on the basis of a sharply critical analysis of the functioning of technical assistance at the point of the design and delivery of programmes and projects this book identifies crucial supply side nodes of power and influence where feasible and relatively straight forward functional reforms strategy structure selection training would make genuinely developmental results for recipients more likely and enhance donor interests at the same time It argues that more authentic empathetic and altruistic technical assistance will be essential to bringing this about The arguments are supported by primary published evidence gathered by the author during 18 years of full time employment as a team leader or programme manager of technical assistance programmes The book will be of interest to students of development management development economics political economy and international relations as well as policy makers development practitioners and supply and demand side government officials
