Taiwan Kim exhorts readers and researchers to examine shadow education as an emerging research inquiry in the context of postcolonial and worldwide curriculum studies **The State of the Art in Student Engagement** Carl Senior,2015-07-10

There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector *Pursuing quality education in Physical and Rehabilitation Medicine*

Francesca Gimigliano,Maria Gabriella Ceravolo,Jorge Lains,2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care International bodies like the UEMS Board for Physical and Rehabilitation Medicine PRM or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education The implementation of such rules is to be validated worldwide with special attention to low and middle income countries This Research Topic aims to stimulate awareness in the scientific community especially for those involved in postgraduate education and policy making decisions It will highlight the need for developing competency based education as a powerful mechanism to align education and training with health

system priorities This holds particular value for resource limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population s health profile but also the strengths and weaknesses e g workforce gaps and maldistributions of the health system This goal can be achieved through sharing experiences between those who have engaged themselves in the process of program development curriculum design and competency based education in rehabilitation Over the last 25 years the number of papers addressing the issue of residency education in PRM has exponentially increased testifying the interest towards the role of rehabilitation and more specifically of the PRM doctors as leaders of the rehabilitation team

McCue,Meera Balasubramaniam,2016-10-27 This book provides a comprehensive view of rational suicide in the elderly a group that has nearly twice the rate of suicide when chronically ill than any other demographic Its frame of reference does not endorse a single point of view about the legitimacy of rational suicide which is evolving across societies with little guidance for geriatric mental health professionals Instead it serves as a resource for both those clinicians who agree that older people may rationally commit suicide and those who believe that this

wish may require further assessment and treatment The first chapters of the book provides an overview of rational suicide in the elderly examining it through history and across cultures also addressing the special case of baby boomers This book takes an ethical and philosophical look at whether suicide can truly be rational and whether the nearness of death in late life adults means that suicide should be considered differently than in younger adults Clinical criteria for rational suicide in the elderly are proposed in this book for the first time as well as a guidelines for the psychosocial profile of an older adult who wants to commit rational suicide Unlike any other book this text examines the existential psychological and psychodynamic perspectives A chapter on terminal mental illness and a consideration of suicide in that context and proposed interventions even without a diagnosable mental illness also plays a vital role in this book as these are key issues in within the question of suicide among the elderly This book is the first to consider all preventative measures including the spiritual as well as the psychotherapeutic and pharmacologic A commentary on modern society aging and rational suicide that ties all of these elements together making this the ultimate guide for addressing suicide among the elderly Rational Suicide in the Elderly is an excellent resource for all medical professionals with potentially suicidal patients including geriatricians geriatric and general psychiatrists geriatric nurses social workers and public health officials *Purposeful Parenting* Jean Barnes, 2015-05-19 Be the Best Parent for Your Child Direct your children onto the right path and when they are older they will not leave it Proverbs 22:6 NLT How you parent directly impacts who your children are and who they will become No one is naturally born a good parent It takes hard work determination and passionate intention to raise our kids
