Optimizing the U.S. Ground-Based Optical and Infrared Astronomy System National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on a Strategy to Optimize the U.S. Optical and Infrared System in the Era of the Large Synoptic Survey Telescope (LSST), 2015-06-26 New astronomical facilities such as the under construction Large Synoptic Survey Telescope and planned 30 meter class telescopes and new instrumentation on existing optical and infrared OIR telescopes hold the promise of groundbreaking research and discovery. How can we extract the best science from these and other astronomical facilities in an era of potentially flat federal budgets for both the facilities and the research grants? Optimizing the U.S. Ground Based Optical and Infrared Astronomy System provides guidance for these new programs that align with the scientific priorities and the conclusions and recommendations of two National Research Council NRC decadal surveys: New Worlds, New Horizons for Astronomy and Astrophysics and Vision and Voyages for Planetary Sciences in the Decade 2013-2022, as well as other NRC reports. This report describes a vision for a U.S. OIR System that includes a telescope time exchange designed to enhance science return by broadening access to capabilities for a diverse community, an ongoing planning process to identify and construct next generation capabilities to realize decadal science priorities, and near term critical coordination planning and instrumentation needed to usher in the era of LSST and giant telescopes.

What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes, 2015 Today about 98 percent of scientists affirm that climate change is human made and about 2 percent still question it Despite that overwhelming majority though about half the population of rich countries like ours choose to believe the 2 percent And paradoxically this large camp of deniers grows even larger as more and more alarming proof of climate change has cropped up over the last decades This disconnect has both climate scientists and activists scratching their heads growing anxious and responding usually by repeating more facts to win the argument But the more climate facts pile up the greater the resistance to them grows and the harder it becomes to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead Is humanity up to the task It is a catch 22 that starts says psychologist and climate expert Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples he shows how to retell the story of climate change and apply communication strategies more fit for the task

***The Chemical News and Journal of Physical Science*, 1911** *Drones and the Future of Air Warfare* Michael P. Kreuzer, 2016-05-26. This book examines the evolution of airpower and specifically the growth and proliferation of Remotely Piloted Aircraft (RPAs). While most existing literature examines either the law or ethics of RPAs and some newer scholarship looks to the battlefield effectiveness, the gains from strikes versus the potential for blowback etc, this work investigates it from a broader military perspective. It examines the strategy for employment of RPAs across the spectrum of warfare, the potential deterrent value of RPAs in some circumstances and the resulting ability of RPAs to fundamentally shift the character of when and how wars are fought. The central aim of this book is to evaluate the role of drones in warfare to date and make basic projections on how states will adopt RPAs and UCAVs in the future. At the core is

(Liton) Kamruzzaman,2019-04-30 The concept of sustainable urban development has been pushed to the forefront of policymaking and politics as the world wakes up to the impacts of climate change and the destructive effects of the Anthropocene Climate change has emerged to be one of the biggest challenges faced by our planet today threatening both built and natural systems with long term consequences which may be irreversible While there is a vast body of literature on sustainability and sustainable urban development there is currently limited focus on how to cohesively bring together the vital issues of the planning development and management of sustainable cities Moreover it has been widely stated that current practices and

lifestyles cannot continue if we are to leave a healthy living planet to not only the next generation but also to the generations beyond The current global school strikes for climate action known as Fridays for Future evidences this The book advocates the view that the focus needs to rest on ways in which our cities and industries can become green enough to avoid urban ecocide This book fills a gap in the literature by bringing together issues related to the planning development and management of cities and focusing on a triple bottom line approach to sustainability The Volta River Basin Timothy O.
