Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies,2015 **The Misery of International Law** John Linarelli,Margot E Salomon,Muthucumaraswamy Sornarajah,2018-03-23 Poverty inequality and dispossession accompany economic globalization Bringing together three international law scholars this book addresses how international law and its regimes of trade investment finance as well as human rights are implicated in the construction of misery and how international law is producing reproducing and embedding injustice and narrowing the alternatives that might really serve humanity Adopting a pluralist approach the authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails do so In a legal order structured around neoliberal ideologies

rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others It studies how a set of principles in the form of a New International Economic Order NIEO that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined As for international human rights law it is under the terms of global capitalism that human rights operate Before we can understand how human rights can create more just societies we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection This book challenges conventional justifications of economic globalization and eschews false choices It is not about whether one is for or against international trade foreign investment or global finance The issue is to resolve how if we are to engage in trade investment and finance we do so in a manner that is accountable to persons whose lives are affected by international law The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it *High Performance Computing* Julian M. Kunkel, Thomas

Ludwig, 2015-06-19 This book constitutes the refereed proceedings of the 30th International Conference ISC High Performance 2015 formerly known as the International Supercomputing Conference held in Frankfurt Germany in July 2015 The 27 revised full papers presented together with 10 short papers were carefully reviewed and selected from 67 submissions The papers cover the following topics cost efficient data centers scalable applications advances in algorithms scientific libraries programming models architectures performance models and analysis automatic performance optimization parallel I/O and energy efficiency
