

Quick note: The first time that you explore how to get the most out of your HP 4800, you'll spend less time figuring out how to use the piece of software, and the more time in *Do It* (a phrase we use a lot). The step-by-step program makes it so easy that you have to program the 4800 settings using the piece it helped to efficiently get the system up and running.

Note: From time to time, to change the pen's delay settings, you must use Peter's Pen Tool programming software installed on a computer. Refer to the PPG-2000 operator's manual, *Pen's Tool* (operator's manual), for more information.
