Thacker's newest addition is packed with the latest research studies and cure-alls. Once considered more cherished than gold, cinnamon has been used for centuries in China to help control blood glucose levels. And according to a 2003 study in Pakistan, cinnamon lowered blood sugar levels in type 2 diabetes patients by as much as 29%. Further studies at Iowa State University find cinnamon may be an effective treatment for those with insulin resistance by increasing the action of insulin. Used for centuries to help ease the pain of arthritis, a modern study at Copenhagen University found a combination of cinnamon and honey gave patients significant relief from arthritis pain after just one week. That is good news. Rush University Medical Center is currently undergoing research into cinnamon's ability to stop nerve fiber damage caused by MS. Study participants are hopeful that one day MS patients can manage the disease with just a teaspoon of ground cinnamon. A study by Georgetown University Medical Center found that cinnamon has a positive effect on blood pressure. German research shows that cinnamon completely suppresses the bacteria that causes urinary tract infections. It is also powerful against the fungus associated with yeast infections.
