Recipe For Rabbit Stew:

Rabbit Stew for Your Soul Bob Ford, 2019-09-19 Bob Ford has been hunting rabbits since he was a kid and has traveled the country with hunting beagles One thing about being a successful hunter is that you will get to enjoy wild game at your kitchen table Over the years Ford has developed many recipes for rabbit and you will find just a few of them here He developed these recipes over more than three decades Some go back to meals that the author's mother made Visits to restaurants inspired others An abundance of harvested rabbits inspired some of the recipes while others were created for those hunts where just one rabbit is brought to the game vest Rabbit meat domesticated is now very popular and while Bob created these recipes with wild game they certainly would work well with domesticated rabbits as well making adjustments for the increased size of domesticated rabbits Rabbits are a sustainable source of protein and very low in fat The contents of this book are recipes developed by a good hunter who is a good home cook **What Springs of Rain** Lindsay Erin

Pathways to Data Robert Wesley Habenstein, It is much better observed C Wright Mills in an essay on intellectual craftsmanship to have one account by a working student of how he is going about his work than a dozen codifications of procedure by specialists who often as not have never done much work of consequence This observation underscores the premise of this book that there is a need for students to communicate the procedures and strategies of field research they have found consequential in their own studies to the less instructed or less experienced The contributors to this book are well known researchers and share their field developed techniques of research craftsmanship The pathways to data they describe wind in a common direction toward a concern with research happenings in situations in agencies associations institutions campaigns demonstrations and goal directed social movements The selections included in *Pathways to Data* are neither biographies of research projects nor subjective evaluations of personal experiences Rather the writers emphasize techniques operations and know how *Pathways to Data*'s chapters are collateral cousins to the collection of research biographies found in *Sociologists at Work* another classic in the field But the lineage or progression of thought traces back to the Webbs *Methods of Social Study* and is most closely related to the Glaser and Strauss volume *The Discovery of Grounded Theory* The contributors to this book reflect a common concern with organization in the down home sense of social bonds opening and closing of self involvement and most importantly social structure Process is stressed above system becoming over being Seen programatically field methods deliver data to concepts and techniques are grounded in the heuristic value such data display Theory is grounded in concepts validated by the effectiveness with which they give meaning to the data The production of social knowledge is symmetrical reciprocal but analytical Provided by publisher
